# State-of-the-art machinery equipment

ACLA - a conception for reliable quality in lift engineering

## ACLA moulded parts: at home in the world of elevators

As one of the leading European manufacturers of high-grade technical polyurethane elastomer parts, ACLA-WERKE have offered a high grade product program for the lift industry for many years. The intensive cooperation with leading global elevator manufacturers has led to special components which are customized and adapted to the requirements of the lift industry.

Besides the high quality level and reliability of the components the ACLA product range is distinguished by functional and maintenance-free designs. Constant quality control and customer oriented research and development make sure that all articles are state-of-the-art.

## Safety by high-tech

In lift engineering safety is the top concern. Therefore ACLA applies only high-grade materials which secure a maximum of reliability in daily service.

As manufacturer and PUR-processing specialist for approx. 60 years in conjunction with a highly efficient quality control system ACLA-WERKE have the necessary know-how to assure a top level quality standard.

Our in-house test bench enables us to proceed with innovations that meet our customers' requirements. The new generation of lift buffers of AUTAN HE has already been certified acc. to EN 81-20/50 since 2015.

## Number “1” in guiding

The ACLA product range for rail guidance is conceived in modular design leaving many options of use and economical application. The well approved ACLA guide shoes and inserts as well as the various rail lubricators develop compact units offering optimal operational performance with a minimum size ratio. The broad ACLA program for guide shoes, guide shoe inserts and lubricators offers the adequate technical and economical answer to any installation situation.

ACLA-Werke GMBH are certified since 1993 for the scope "Design, production and sale of technical articles of polyurethane elastomers". From January 2004 on this certification is carried out by DEKRA.

## Innovation for excellence in ride quality and enhanced security level serving elevator manufacturers

Numerous product developments and enhancements over the past years, i.e. guide shoe inserts with highly extended ride comfort or special executions of PU lift buffers, account for the increased efficiency and reliability of modern elevators throughout the world.

The most recent and state of the art production techniques and a process adapted as well to small batch series as to mass production enables ACLA-WERKE to fulfill all market requirements of elevator industry.

# High grade materials for the elevator industry

## Material competence at the highest stage

As manufacturer of various elastomers with an in-house R & D for compositions and its 60 years of experience in processing and manufacturing ACLA-WERKE are in a position to fulfill the top quality requirements of the lift industry with its customized products.

For the various requirements in lift industry ACLA-WERKE applies different materials with different specific compositions which are tailored to particular needs of elevator industry.

This page gives a review of the main homogeneous and cellular polyurethane elastomers as well as highly tensile thermoplastic materials which are applied in the elevator industry.

More detailed information on specific properties of ACLA compositions can be provided upon request.

Material	Brief description	Main properties (extract)	Preferred field of application in lift engineering
<b>Homogeneous polyurethane elastomers</b>			
<b>ACLATHAN</b> (brown)	High grade NDI-based PUR elastomer in shore hardnesses ranging from 65 to 95 Shore A	<ul style="list-style-type: none"> <li>extremely wear- and tear resistant</li> <li>high tear propagation resistance</li> <li>high dynamic load bearing capacity</li> <li>low compression set</li> <li>and high damping ability</li> <li>good resistance against mineral oils, grease and petrol</li> </ul>	Guide shoes/type VS, guide shoe inserts, clamping elements for oil collectors, profiled- and door guide rollers, chain- and step rollers
<b>ACLATHAN-KH</b> (red)	TPU-based PUR elastomer with shore hardnesses up to 96 Shore A	<ul style="list-style-type: none"> <li>high elasticity for a wide temperature range</li> <li>good wear and tear resistance</li> <li>good damping ability</li> <li>noise-absorbing</li> <li>good resistance against mineral oils, grease and petrol</li> </ul>	Guide shoes/type VS, guide shoe inserts,
<b>ACLATHAN-KH</b> (black)	TPU-based PUR elastomer	<ul style="list-style-type: none"> <li>good damping ability</li> <li>good wear resistance</li> <li>good resistance against mineral oils, grease and petrol</li> </ul>	Gliding elements
<b>Cellular polyurethane elastomers</b>			
<b>AUTAN</b>	Highly elastic cellular PUR elastomer with a density up to approx. 460 kg/m³	<ul style="list-style-type: none"> <li>high stability level</li> <li>excellent vibration damping features</li> <li>good resistance against mineral oils, grease and petrol</li> </ul>	Lift buffers according to EN-81, damping inserts for guide shoes, noise-isolation material
<b>AUTAN HE</b>	Highly elastic cellular PUR elastomer with a density up to approx. 600 kg/m³	<ul style="list-style-type: none"> <li>excellent stability level</li> <li>excellent vibration damping features</li> <li>good resistance against mineral oils, grease and petrol</li> </ul>	Lift buffers according to DIN EN 81-20/50
<b>High tensile materials</b>			
<b>ACLAMID</b> (green/ guide shoe inserts, white/Rollers)	Special polymer with high Young's modulus	<ul style="list-style-type: none"> <li>high mechanical strength</li> <li>good gliding and running properties</li> <li>low rolling resistance</li> <li>small deformation</li> <li>good medium resistance</li> </ul>	Guide shoes/type VS, guide shoe inserts, flat and round cable suspensions, rope pulleys, profiled- and door guide rollers, chain- and step rollers
<b>ACLASYN GR</b> (grey) <b>ACLASYN MWG 10 sw</b> (black)	Thermoplastic material with especially modified physical and chemical properties	<ul style="list-style-type: none"> <li>excellent gliding properties</li> <li>excellent wear resistance</li> <li>good medium resistance</li> </ul>	Guide shoes/type VS, guide shoe inserts, gliding elements

ACLATHAN®, ACLACELL®, AUTAN®, EUTHAN® are registered trade marks of ACLA-WERKE GMBH, Cologne.

## ACLA Guide Shoes, type VS

- installation height 60, 80 and 100 mm
- completely made of ACLATHAN, ACLATHAN-KH, ACLAMID or ACLASYN GR
- for rail widths of 4 - 7 mm

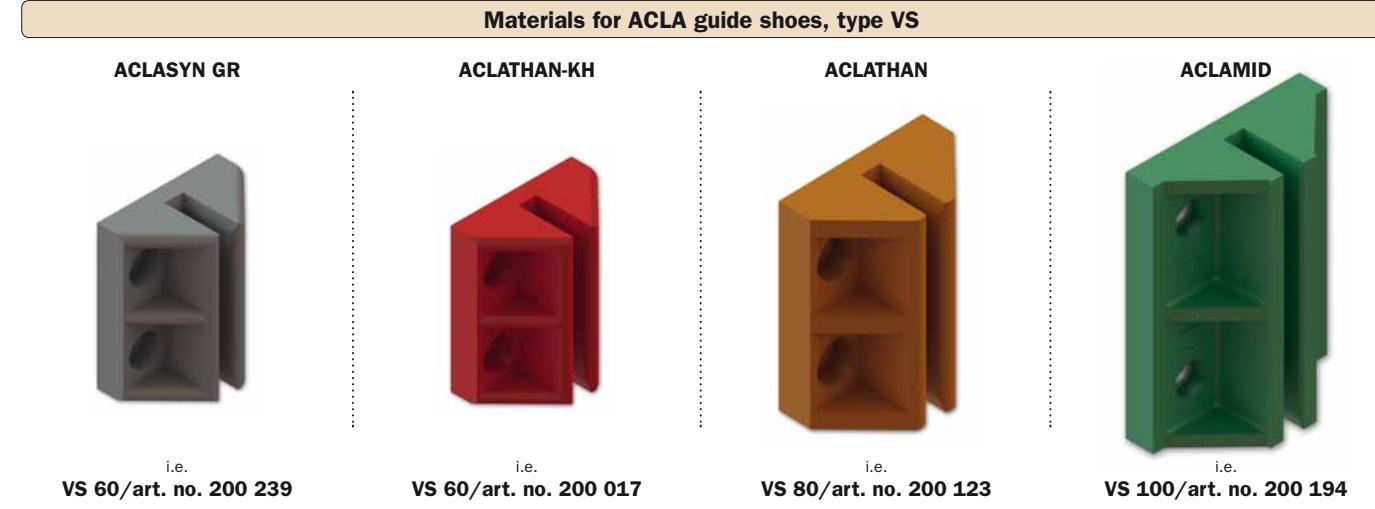

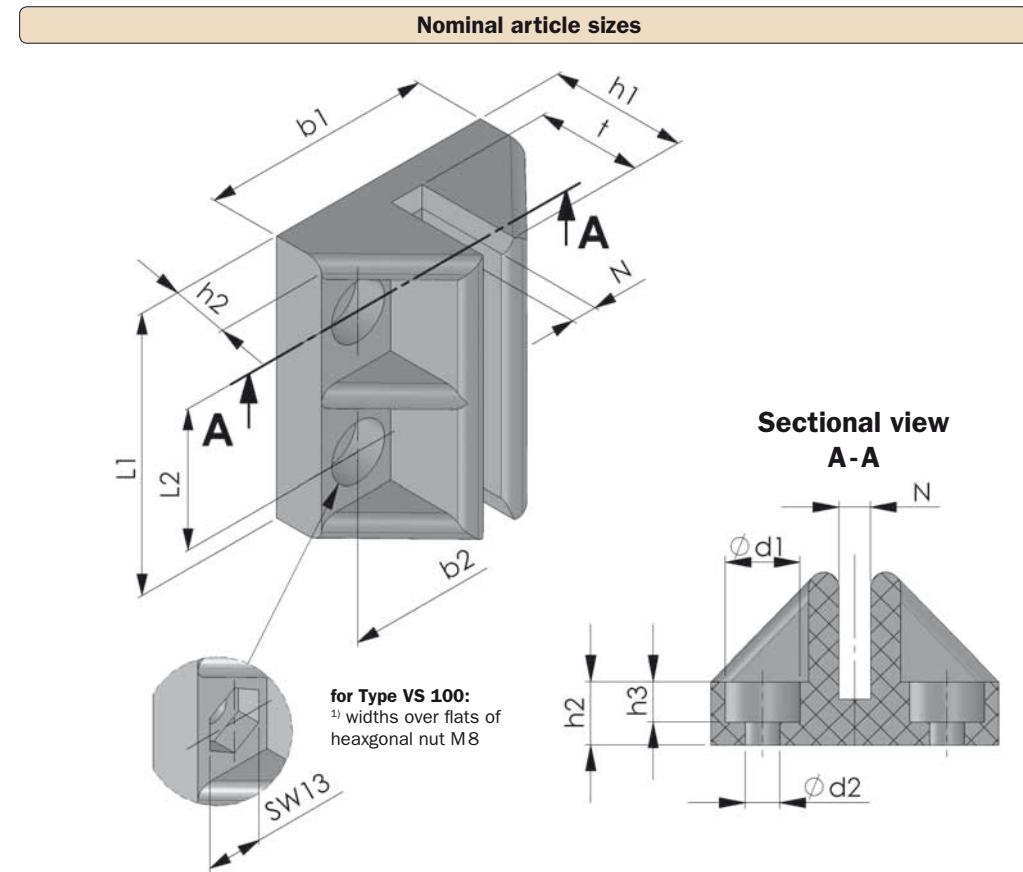

### Completely made of plastic material

ACLA guide shoes type VS are completely manufactured of the high-quality homogeneous polyurethane elastomer ACLATHAN/ACLATHAN-KH, the high-duty special polyamide ACLAMID or ACLASYN GR with special gliding abilities.

### Advantages for the users and operational possibilities

Small sizes, low weight and functional design (separate guide shoe inserts are not required) are especially interesting for light weight lifts like small goods and food lifts.

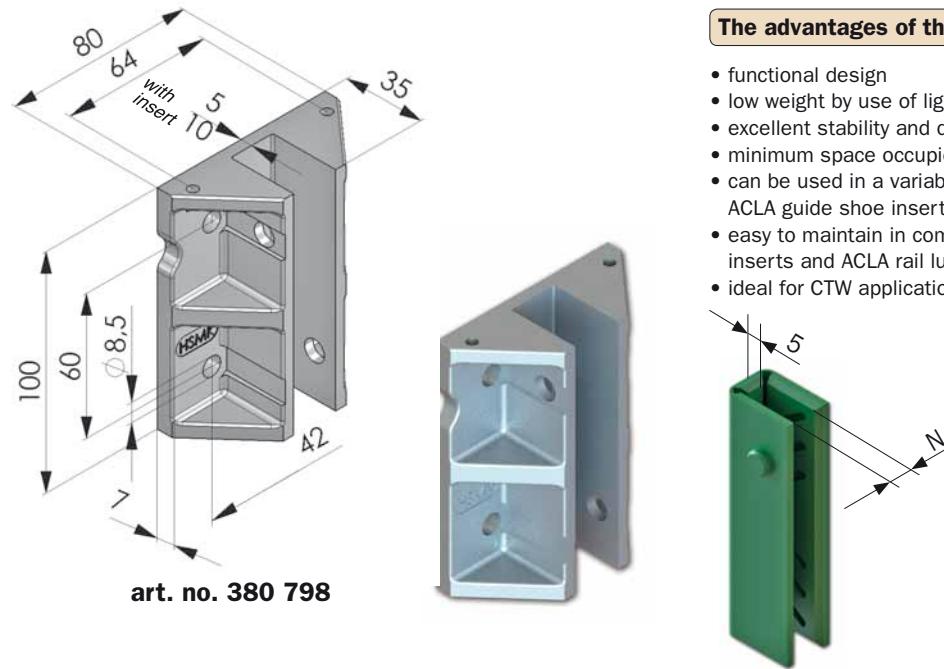

The excellent abrasion resistance and elasticity of the material as well as the outstanding damping properties and the good sliding ability result in a silent running as well as economical and reliable operation.

## ACLA Guide Shoe, type HSMK

- installation height 100 mm
- undamped and damped guide shoe inserts for rail widths of 5 - 10 mm
- rail lubricators AK 2 and AK 4 are appropriate

### The advantages of the ACLA guide shoe, type HSMK

- functional design
- low weight by use of light metal alloy base
- excellent stability and durability
- minimum space occupied
- can be used in a variable way in combination with ACLA guide shoe inserts for different rail widths
- easy to maintain in combination with ACLA guide shoe inserts and ACLA rail lubricators
- ideal for CTW applications

### Appropriate ACLA rail lubricators for guide shoe HSMK

(for detailed information on ACLA rail lubricators, please see page 31)

**Rail lubricator AK 2**  
art. no. 90 323

**Mounting instructions:**  
To compensate the overlap on the backside (3 mm) between lubricator and guide shoe a distance plate should be used.

**Rail lubricator AK 4**  
art. no. 90 337.01

**Mounting instructions:**  
To compensate the overlap on the backside (4 mm) between lubricator and guide shoe a distance plate should be used.

ACLA guide shoe HSMK, mounted with lubricator AK 4 and undamped guide shoe insert, type FSU convex (ACLATHAN)

## ACLA Guide Shoe, type HSMKW

- installation height 100 mm
- undamped and damped guide shoe inserts for rail widths of 8 - 16 mm
- rail lubricators AK 2 and AK 4 are appropriate

### The advantages of the ACLA guide shoe, type HSMKW

- functional design
- low weight by use of light metal alloy base
- excellent stability and durability
- minimum space occupied
- can be used in a variable way in combination with ACLA guide shoe inserts for different rail widths
- easy to maintain in combination with ACLA guide shoe inserts and ACLA rail lubricators

## ACLA Guide Shoe, type HSMN (for easy mounting)

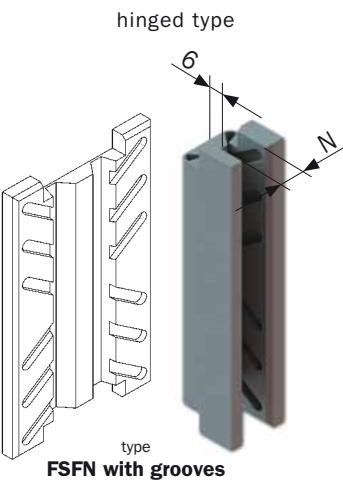

- installation height 140 mm
- guide shoe inserts for rail widths of 5 - 16 mm
- rail lubricators AK 2 and AK 10 are appropriate

### The advantages of the ACLA guide shoe, type HSMN

- functional design
- low weight by use of light metal alloy base
- excellent stability and durability
- sizes as per standard type HSM, however designed for the assembly of the ACLA guide shoe inserts FSFN for easy mounting
- inserts can be replaced without dismantling the guide shoe
- the symmetrical design of the insert allows an easy mounting and dismounting and saves adjustment work when replacing it
- minimum space occupied
- can be used in a variable way in combination with ACLA guide shoe inserts for all rail widths
- easy to maintain in combination with ACLA guide shoe inserts and ACLA rail lubricators

### Appropriate guide shoe insert for ACLA guide shoe HSMN - undamped -

### article numbers for HSMN guide shoe inserts

insert type	material*	for rail width N

### Appropriate ACLA rail lubricators for guide shoe HSMN

(for detailed information on ACLA rail lubricators, please see page 31)

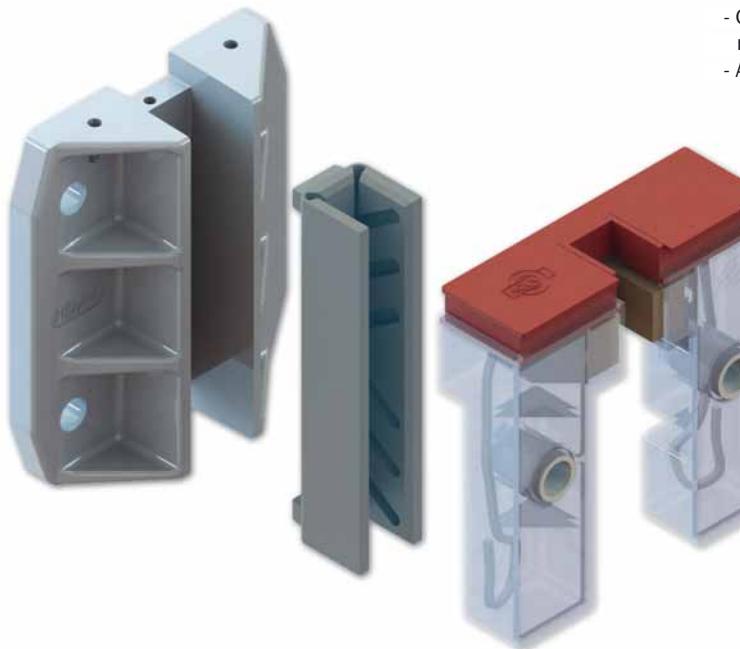

ACLA guide shoe HSMN,  
mounted with lubricator AK 2  
and undamped guide shoe insert,  
type FSFN with grooves (ACLATHAN-KH)

ACLA guide shoe HSMN,  
mounted with lubricator AK 10  
and undamped guide shoe insert,  
type FSFN with grooves (ACLAMID)

## ACLA Guide Shoe, Type HSM (N-Type) low-cost turnkey solution for rail width 16 mm

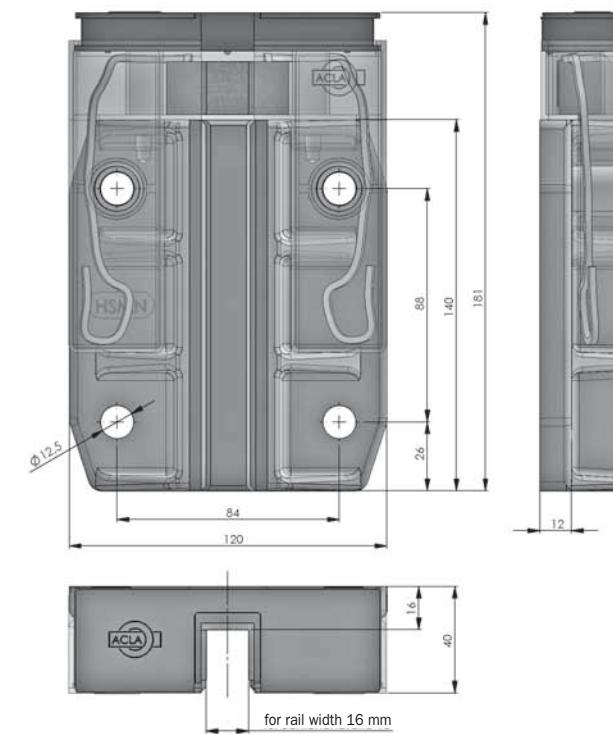

- installation height 140 mm
- insert pre-assembled
- the oil lubricator is fixed with the guide shoe

### The advantages of the ACLA guide shoe, type HSMN (N-type)

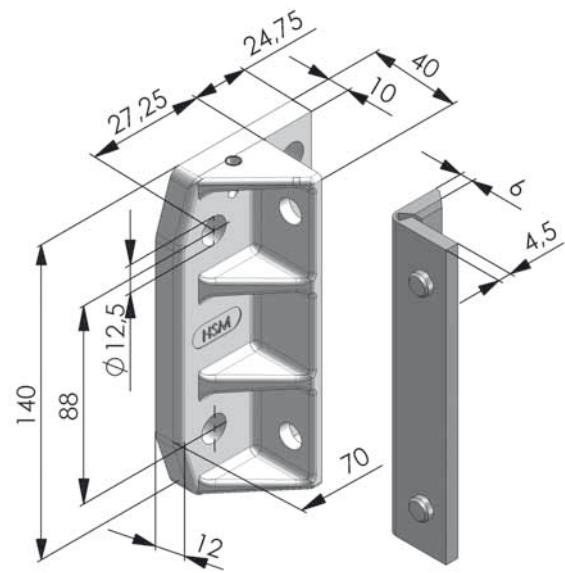

- complete solution for the common rail 16 mm
- outstanding quality, stability and durability by use of light metal alloy base
- dimensions compatible with standard type HSM
- scope of supply/partly pre-assembled:
  - HSMN guide shoe, art.-no. 380 796.01
  - Guide shoe insert with grooves for rail width 16 mm made of ACLASYN GR, art.-no. 200 447
  - ACLA Rail lubricator AK 10, art.-no. 900 021.S

The time-saving and cost-effective turnkey solution for the replacement of HSM Guide Shoe including insert and lubricator

## ACLA Guide Shoe, type HSM half

- installation height 120 mm and 140 mm
- for rail widths of 5 - 19 mm

art. no. 380 806

### The advantages of the ACLA guide shoe, type/half

- installation height 140 mm
- space-saving construction for narrow mounting situations
- low weight by use of light metal alloy base
- excellent stability and durability

Appropriate guide shoe inserts,  
type FSF (hinged/undamped)  
see table

### article numbers for HSM/half guide shoe inserts

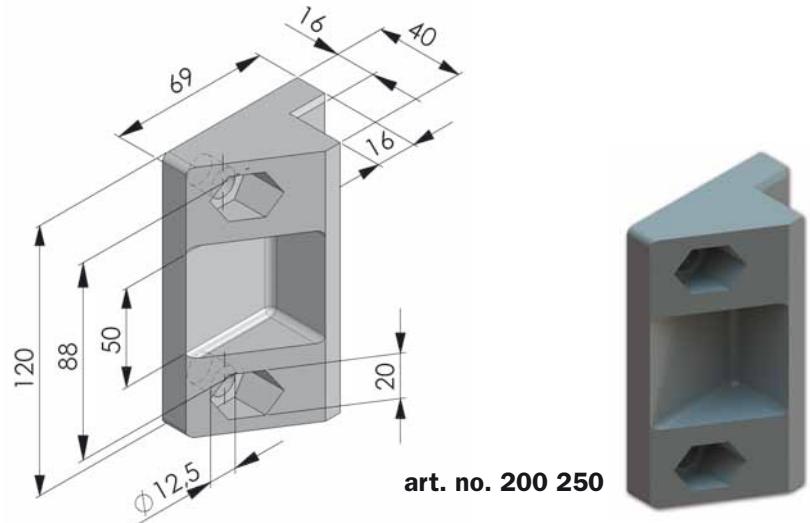

insert type	material*	
FSF plain	ACLATHAN-KH	200 433
FSF with grooves	ACLAMID	200 434
FSF with grooves	ACLASYN GR	200 269
FSF plain	ACLASYN MWG 10 sw	200 301.04

\*Characteristics and description of ACLA materials, please see page 6.

Information on colour differences of guide shoe insert materials:

ACLATHAN = brown, ACLATHAN-KH = red, ACLAMID = green, ACLASYN GR = grey, ACLASYN MWG 10 (sw) = black.

### Guide shoe HSM/half of ACLASYN GR

art. no. 200 250

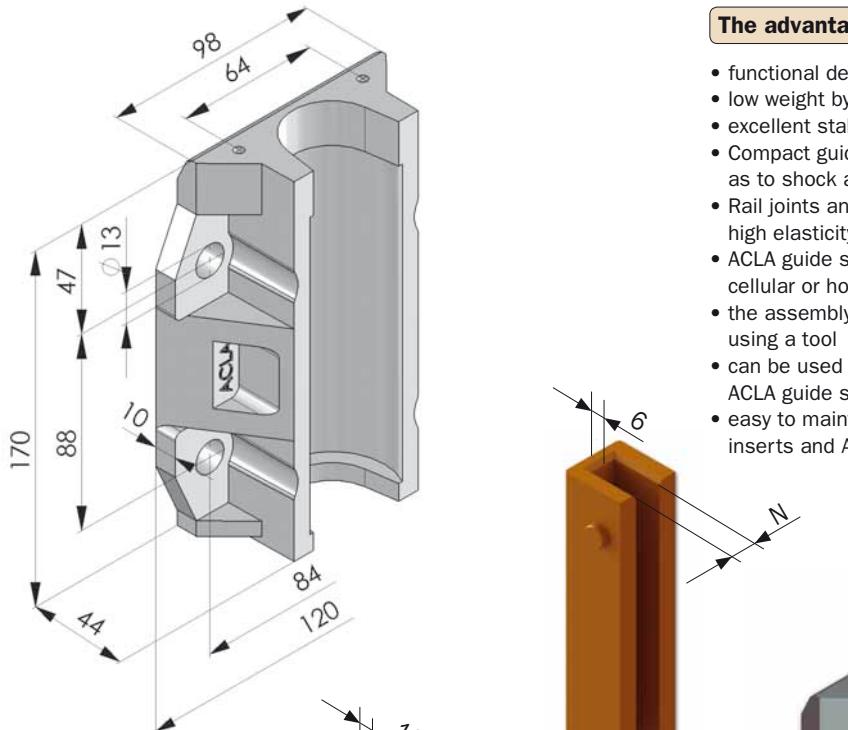

- installation height 120 mm
- completely made of ACLASYN GR
- can be used for rail widths from 5 to 16 mm without any additional insert

# Focus on quality in ACLA production processes

## ACLA Guide Shoe, type SHS (Elastic Guide Shoe)

- installation height 170 mm
- guide shoe inserts for rail widths of 5 - 20 mm
- rail lubricators AK 2 and AK 5 are appropriate

### The advantages of the ACLA guide shoe, type SHS

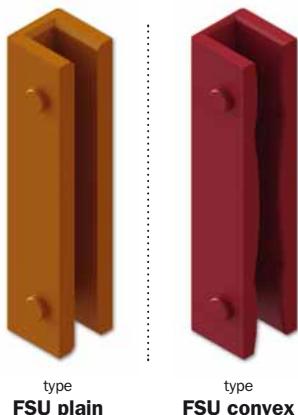

- functional design
- low weight by use of light metal alloy base
- excellent stability and durability
- Compact guide shoe with excellent properties as to shock absorption
- Rail joints and misalignments are absorbed by the high elasticity of the entire construction
- ACLA guide shoe inserts are embedded in a highly elastic cellular or homogeneous intermediate layer
- the assembly of the insert and cushion is possible without using a tool
- can be used in a variable way in combination with ACLA guide shoe inserts for all rail widths
- easy to maintain in combination with ACLA guide shoe inserts and ACLA rail lubricators

art. no. 380 812

### Appropriate guide shoe inserts for ACLA guide shoe SHS - undamped -

\*Characteristics and description of ACLA materials, please see page 6. Information on colour differences of guide shoe insert materials:  
ACLATAN = brown, ALCATHAN-KH = red, ACLAMID = green, ACLASYN GR = grey, ACLASYN MWG 10 (sw) = black.

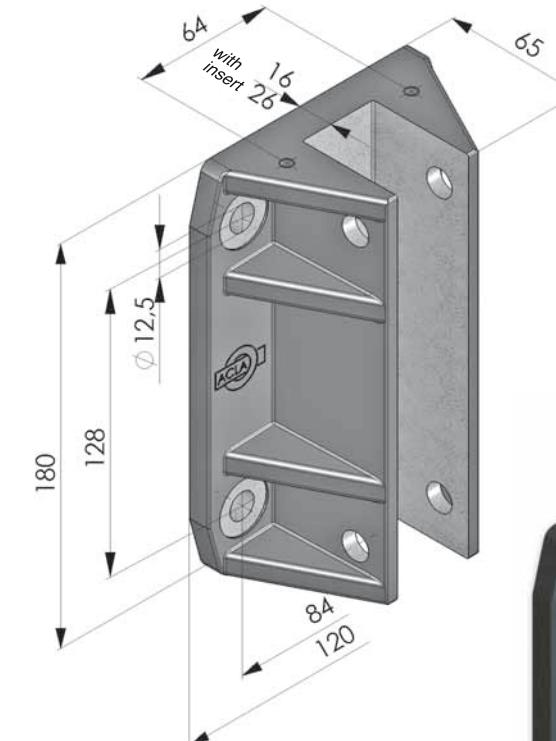

## ACLA Guide Shoe, type HSML and HSMLS

- installation height
- guide shoe inserts for rail widths of 14 - 29 mm
- rail lubricators AK 2 and AK 10 are appropriate

### The advantages of the ACLA guide shoe, type HSML

- functional design
- low weight by use of light metal alloy base
- excellent stability and durability
- minimum space occupied
- can be used in a variable way in combination with ACLA guide shoe inserts for rail widths from 14 to 29 mm
- easy to maintain in combination with ACLA guide shoe inserts and ACLA rail lubricators

**type HSMLS**  
art. no. 380 834

Special design for high load lifts with improved breaking force in comparison to type HSML.

Breaking force: 240 kN

Rail lubricator AK 2  
art. no. 90 323.03

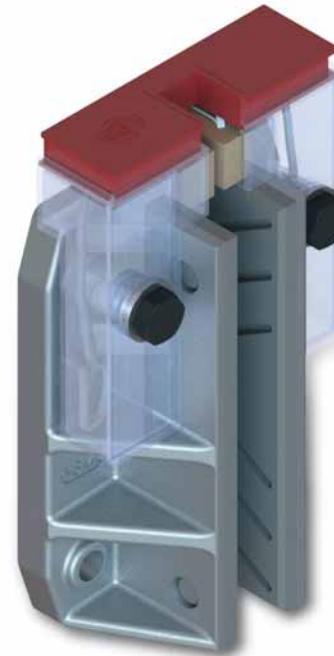

ACLA guide shoe HSMLS, mounted with lubricator AK 2 and undamped guide shoe insert, type FSF with grooves (ACLAMID).

### Appropriate ACLA rail lubricators for guide shoe HSML

(for detailed information on ACLA rail lubricators, please see page 31)

Rail lubricator AK 2  
art. no. 90 323

Rail lubricator AK 10  
art. no. 90 021

ACLA guide shoe HSML, mounted with lubricator AK 2 and undamped guide shoe insert, type FSF with groove (ACLAMID).

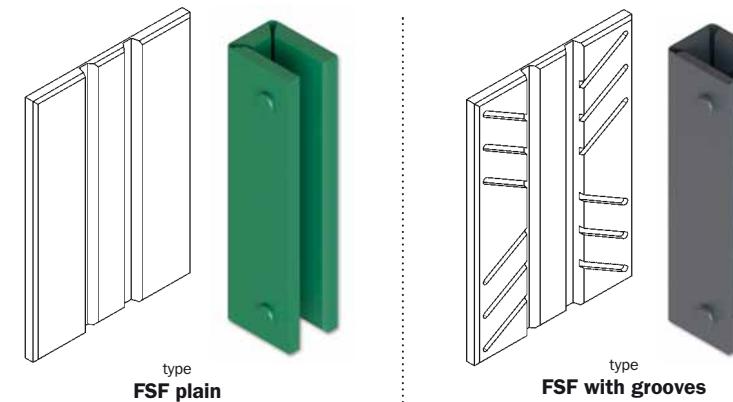

ACLA guide shoe HSML, mounted with lubricator AK 10 and undamped guide shoe insert, type FSF with groove (ACLASYN GR).

**Appropriate ACLA rail lubricator for guide shoe HSMLS**  
(for detailed information on ACLA rail lubricators, please see page 31)

## ACLA Guide Shoe, type HSMXL

- installation height 355 mm
- guide shoe inserts for rail widths of 14 - 29 mm
- rail lubricators AK 2 and AK 10 are appropriate

### The advantages of the ACLA guide shoe, type HSMXL

- special design for high load and rucksack lifts
- low weight by use of light metal alloy base
- excellent stability and durability
- minimum space occupied
- can be used in a variable way in combination with ACLA guide shoe inserts for rail widths from 14 to 29 mm
  - easy to maintain in combination with ACLA guide shoe inserts and ACLA rail lubricators

### Appropriate ACLA rail lubricators for guide shoe HSMXL

(for detailed information on ACLA rail lubricators, please see page 31)

Rail lubricator AK 2  
art. no. 90 323

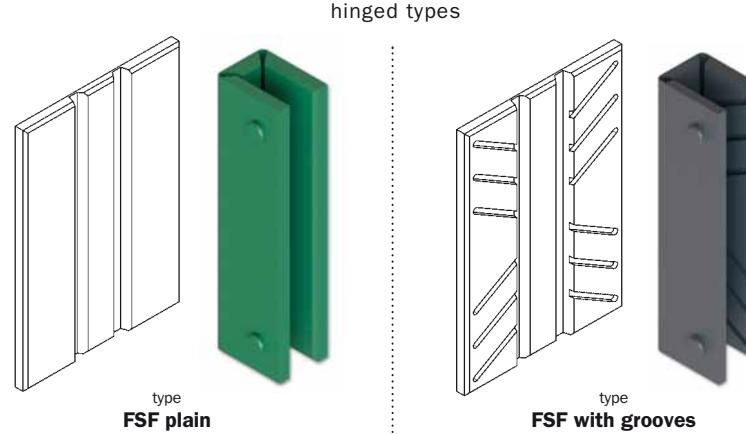

Rail lubricator AK 10  
art. no. 90 021

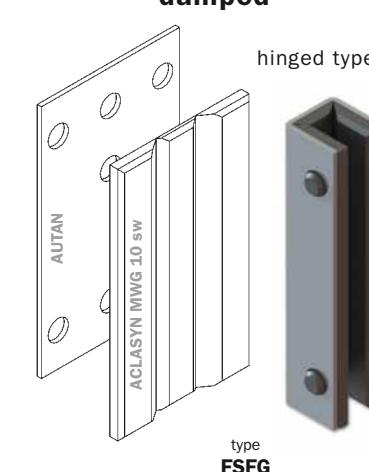

ACLA guide shoe HSMXL,  
mounted with lubricator AK 10  
and undamped guide shoe insert,  
type FSF with grooves  
(ACLASYN GR).

### Appropriate guide shoe inserts for ACLA guide shoe HSMXL

#### - undamped -

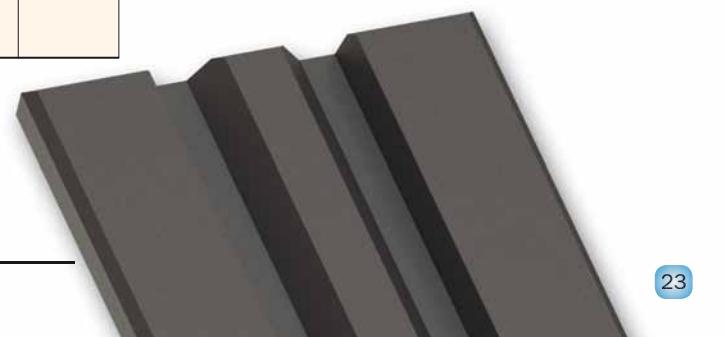

#### - damped -

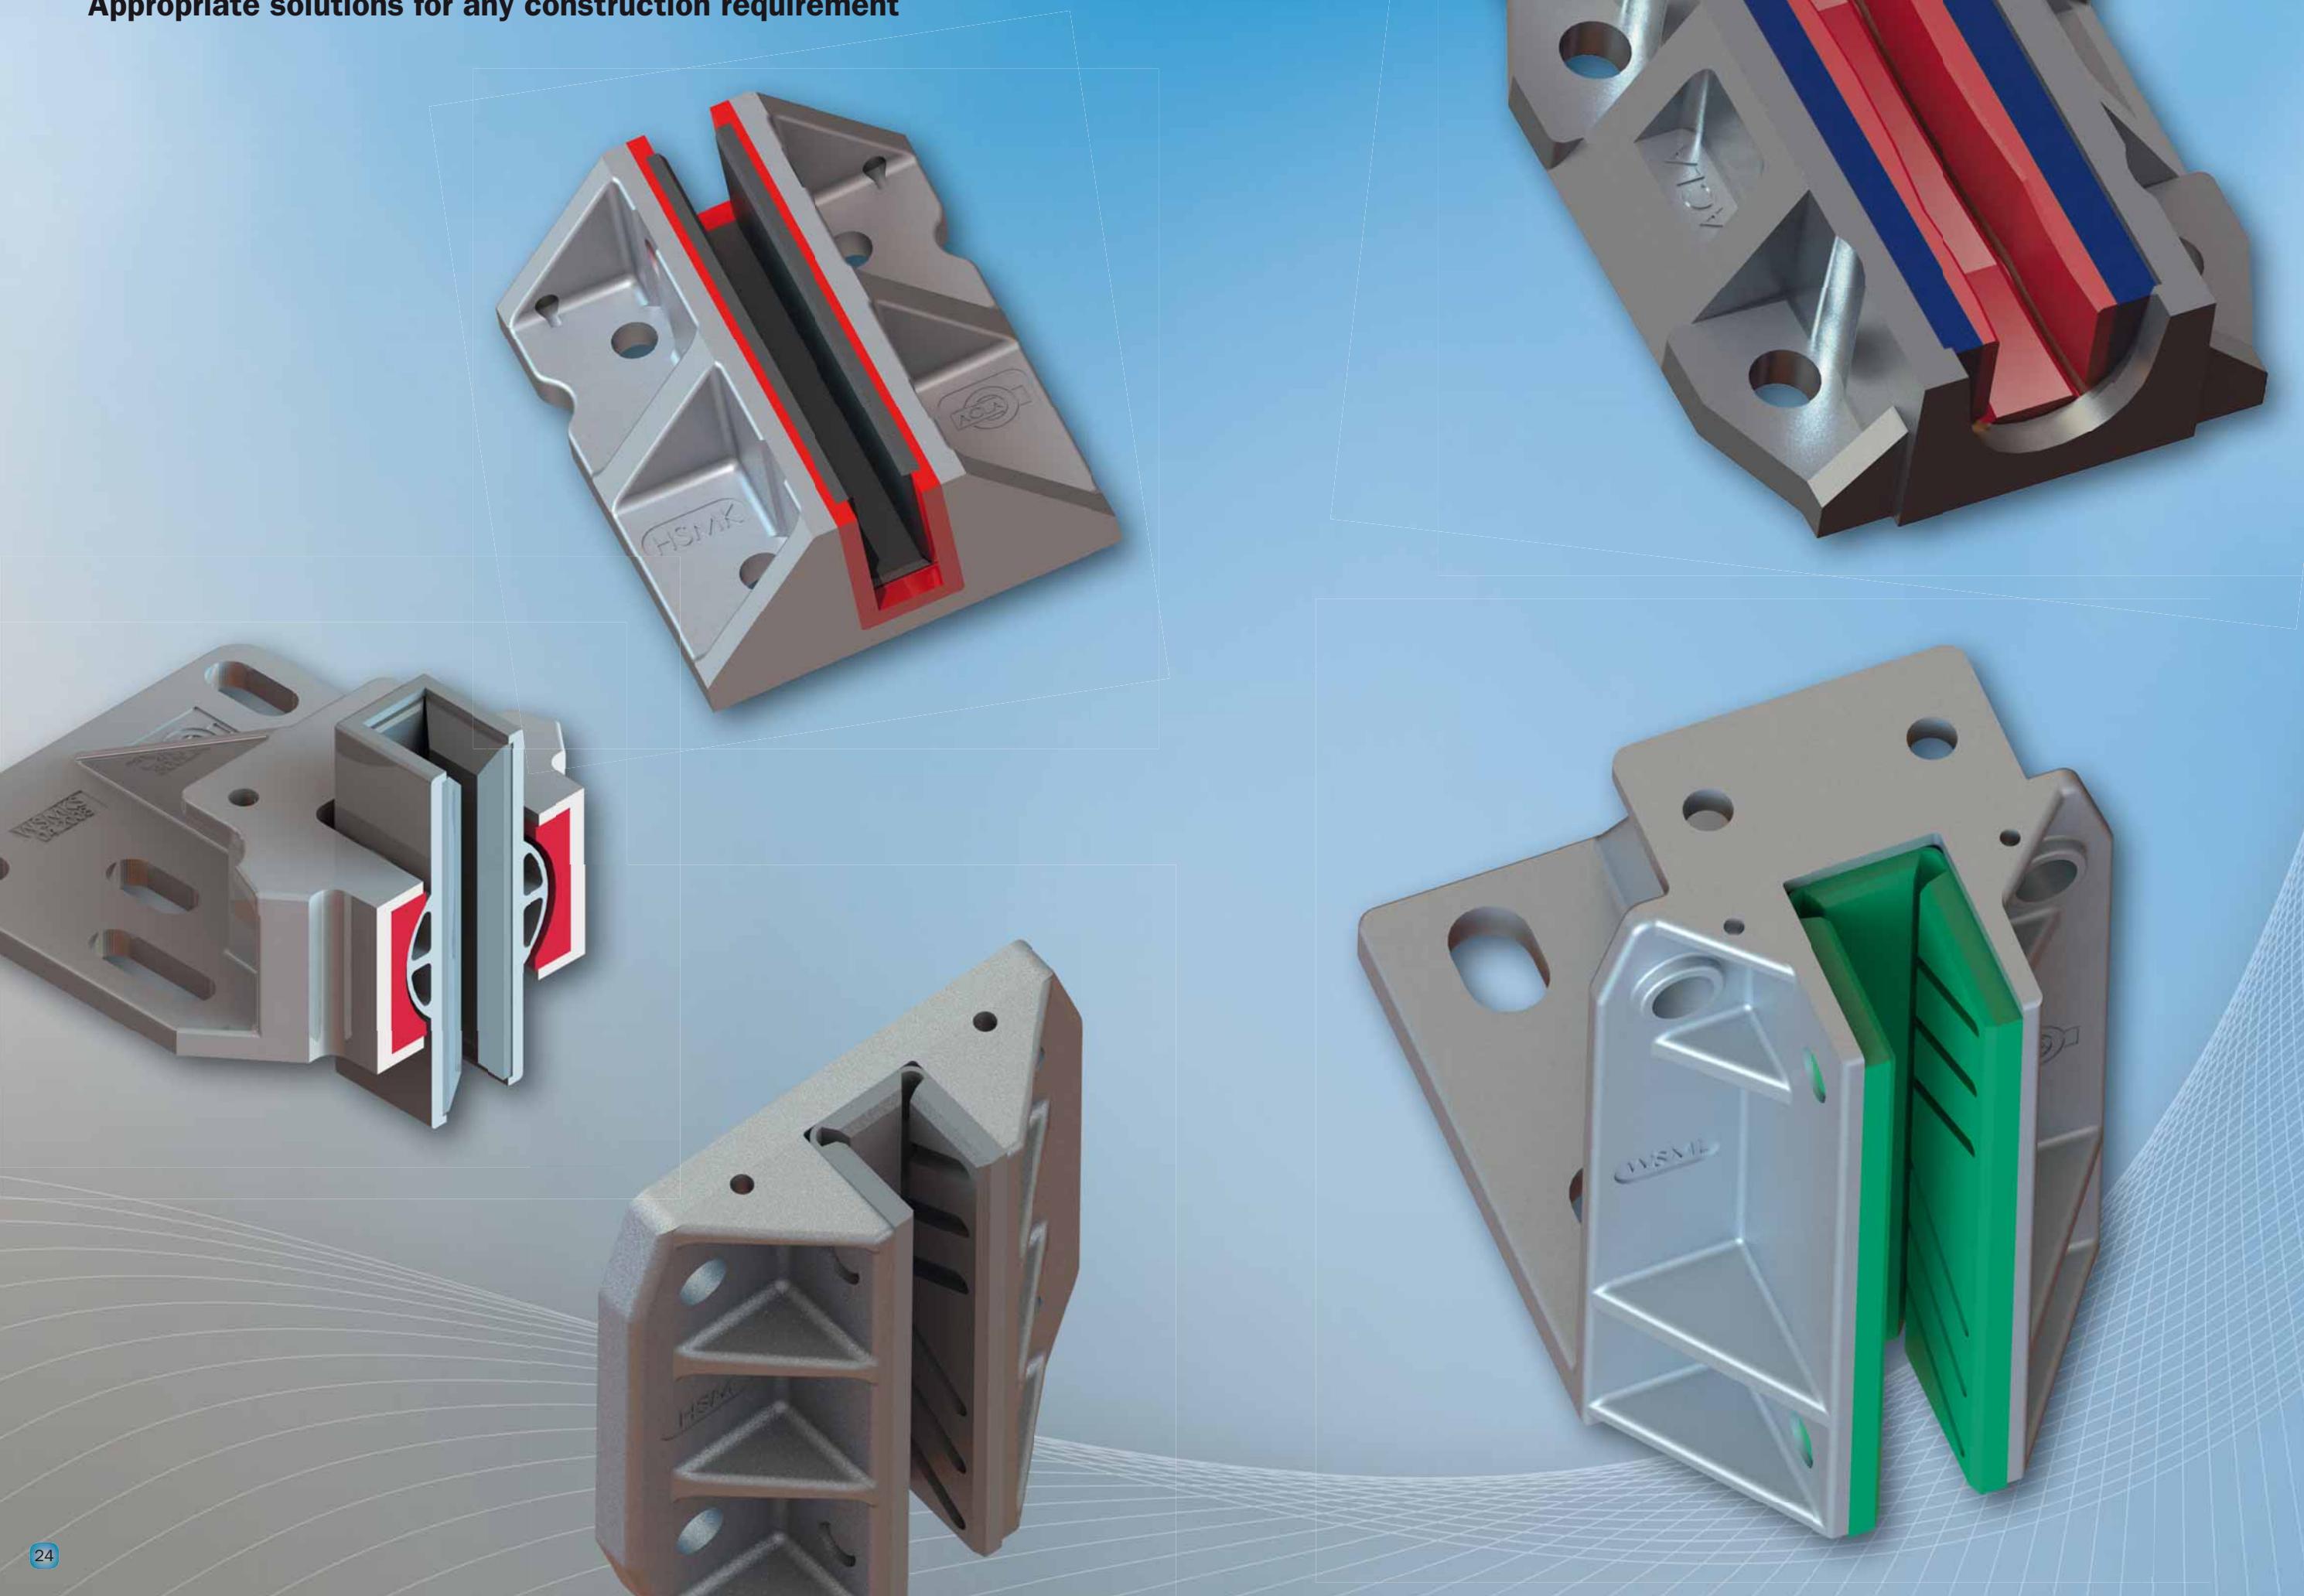

### article numbers for HSMXL guide shoe inserts HSMXL needs two guide shoe inserts each

FSUGG	ACLASYN MWG 10 sw with ACLATHAN-KH layer	200 289.06			200 291.06	

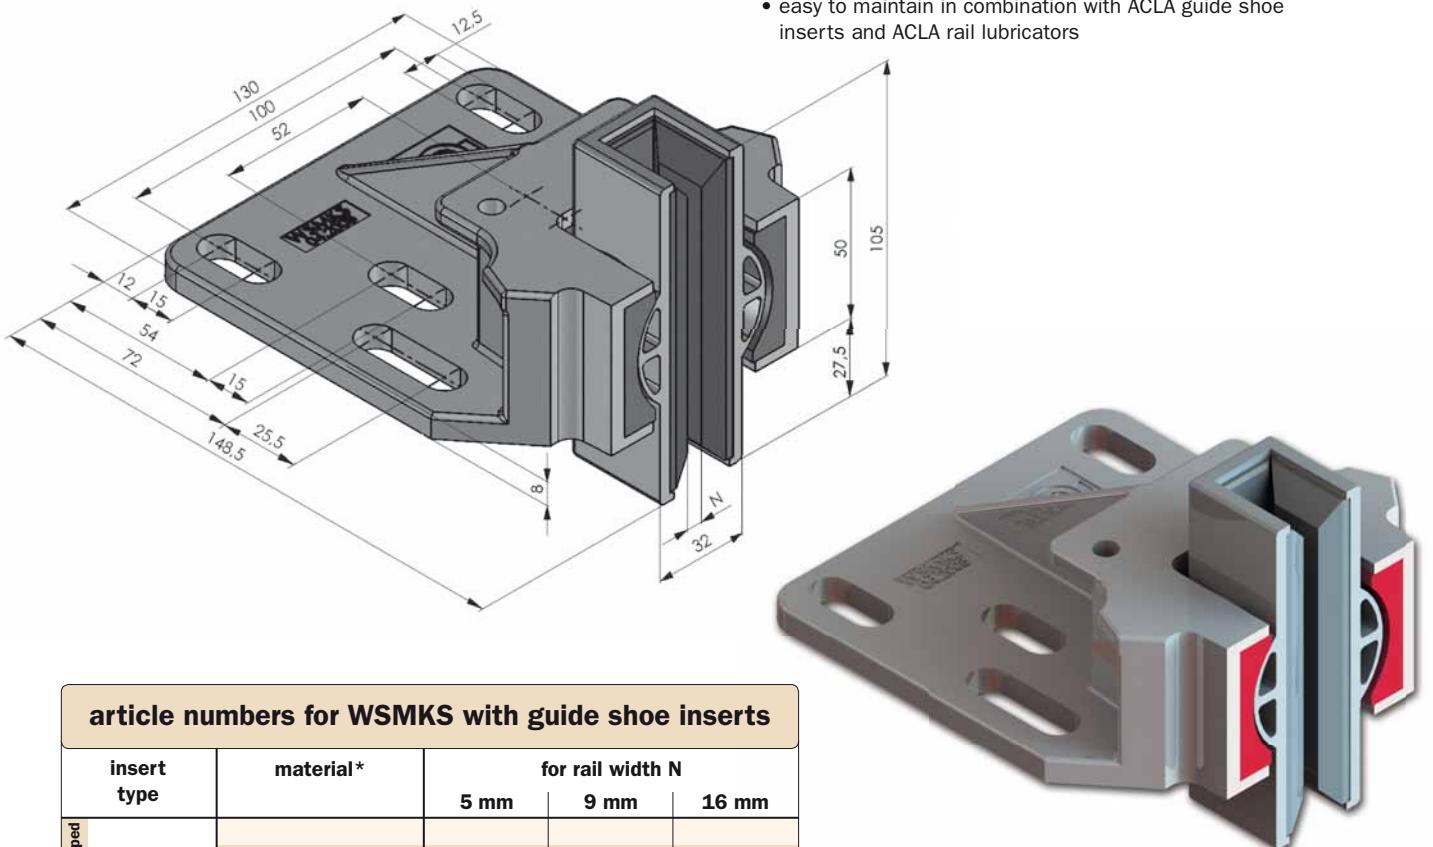

\*Characteristics and description of ACLA materials, please see page 6. Information on colour differences of guide shoe insert materials: ACLATHAN = brown, ACLATHAN-KH = red, ACLAMID = green, ACLASYN GR = grey, ACLASYN MWG 10 (sw) = black.

## ACLA Angled Guide Shoe, type WSMKS

- installation height 105 mm
- damped guide shoe
- guide shoe inserts for rail widths of 5, 9 and 16 mm
- rail lubricator AK 2 is appropriate

### The advantages of the ACLA guide shoe, type WSMKS

- functional design
- low weight by use of light metal alloy base
- excellent stability and durability
- gedämpfte Ausführung durch hochelastische Zwischenlage
- minimum space occupied
- corrects angle errors
- easy to maintain in combination with ACLA guide shoe inserts and ACLA rail lubricators

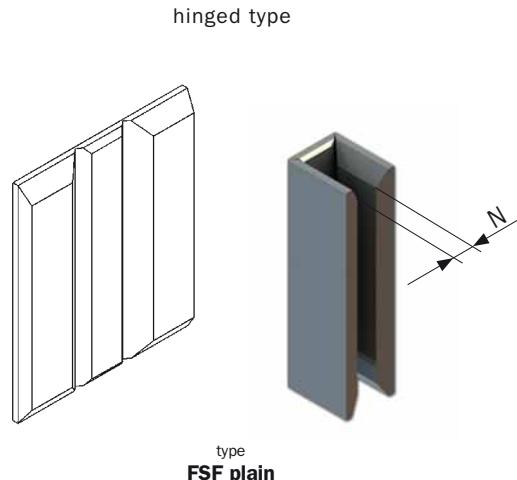

### article numbers for WSMKS with guide shoe inserts

insert type	material*	for rail width N		
		5 mm	9 mm	16 mm
undamped FSF glatt	ACLASYN MWG 10 sw	380 843.06	380 838.06	380 839.06

\*Characteristics and description of ACLA materials, please see page 6

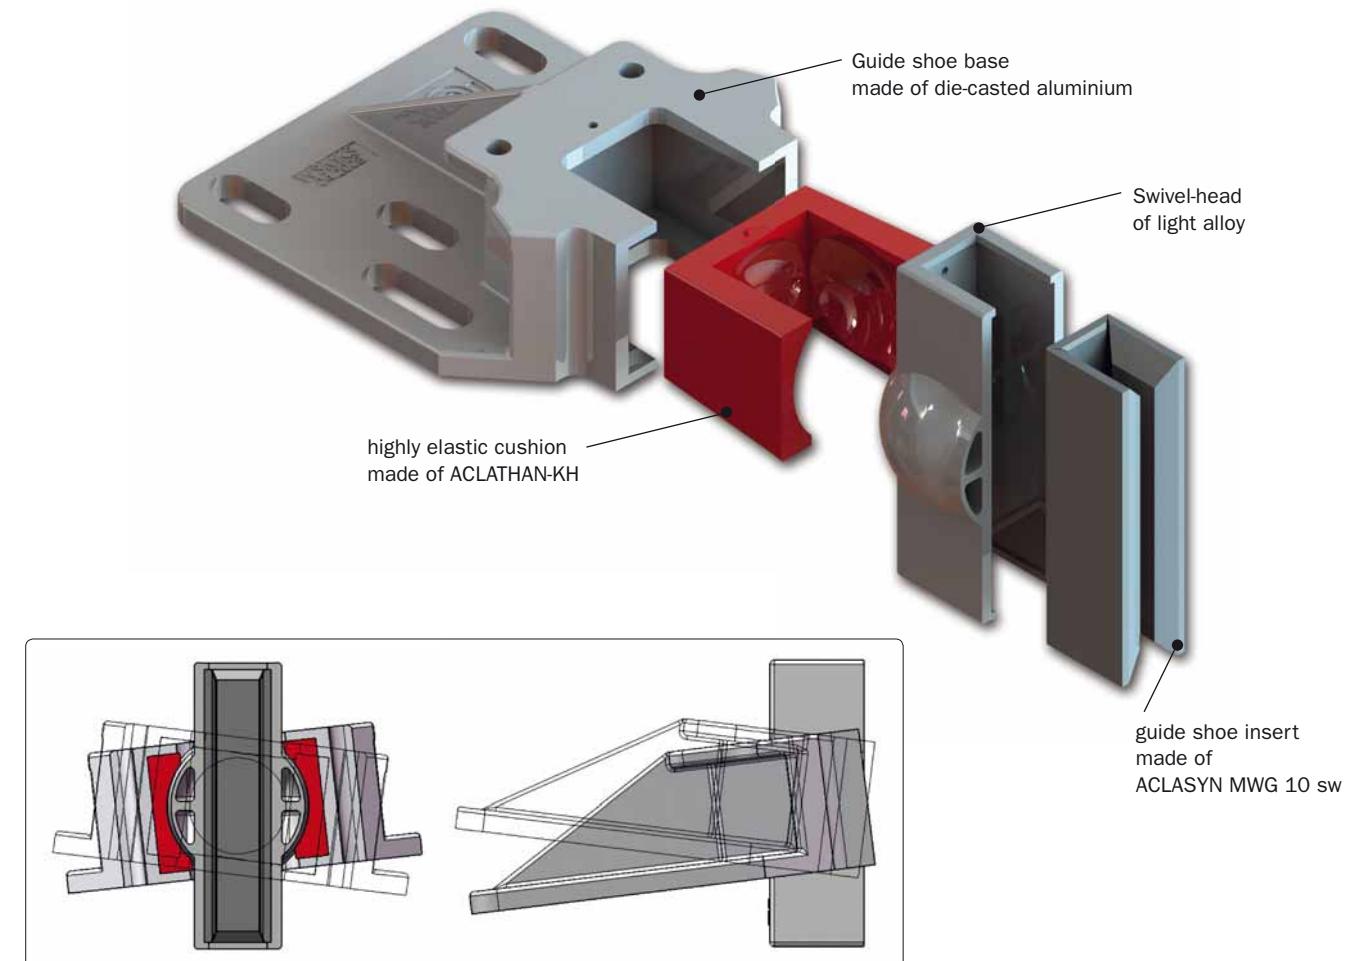

### Appropriate guide shoe inserts for ACLA guide shoe WSMKS - undamped -

### article numbers for WSMKS guide shoe inserts

insert type	material*	for rail width N		
		5 mm	9 mm	16 mm
undamped FSF plain	ACLASYN MWG 10 sw	200 375.04	200 369.04	200 370.04

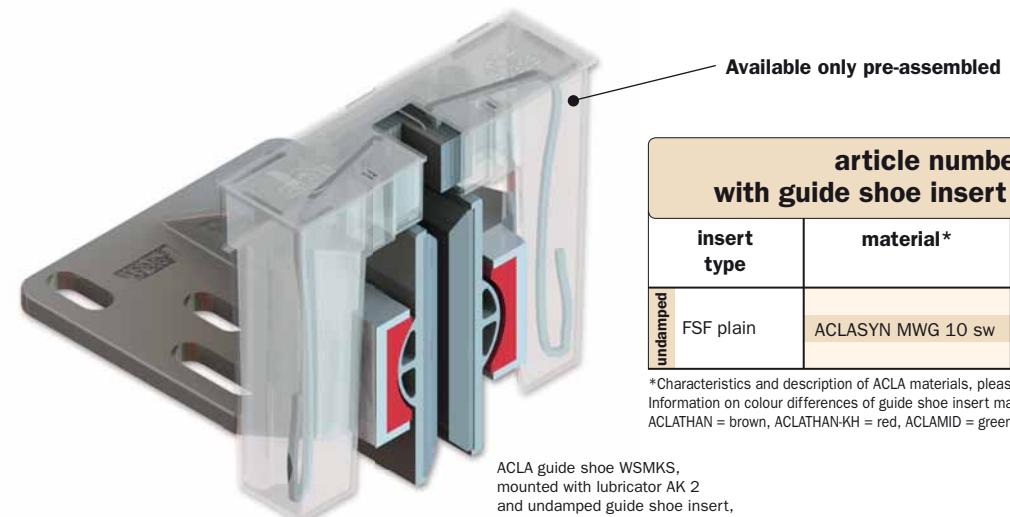

### Setting and functional principle of ACLA guide shoe, type WSMKS

The well-conceived construction of ACLA guide shoes WSMKS allows to correct horizontal and vertical angle errors.

### Appropriate ACLA rail lubricators for guide shoe WSMKS

(for detailed information on ACLA rail lubricators, please see page 31)

### article numbers for WSMKS with guide shoe insert and rail lubricator AK 2

insert type	material*	for rail width N		
		5 mm	9 mm	16 mm

ACLATHAN = brown, ACLATHAN-KH = red, ACLAMID = green, ACLASYN GR = grey, ACLASYN MWG 10 (sw) = black.

## ACLA Rail Lubricators overview

### Advantages of the ACLA rail lubricators

- all-purpose usable for all popular rail widths by selfadjusting felt jaws
- constant feed of lubricant by capillary action of selected felt and wick quality
- low oil consumption
- can be filled from both sides/ from the top
- friendly to the environment since dripping oil in the shaft base is avoided
- minimum space occupied in combination with ACLA guide shoes
- low weight
- easy and fast mounting on the ACLA guide shoes
- good accessibility to the oil tank by means of the hinged cover
- easy oil level check on account of the transparent body
- no additional maintenance

### Rail Lubricator AK 2

- for rail widths up to 30 mm
- max. filling level = 80 ml
- weight approx. 100 g

### art. no. 90 323

(for rail widths up to 16 mm/fixation with tapping screw Ø 5 x 16 mm)  
**art. no. 90 323.03**  
(for rail widths up to 16 mm/fixation M6 x 10 mm)

### art. no. 90 323.05

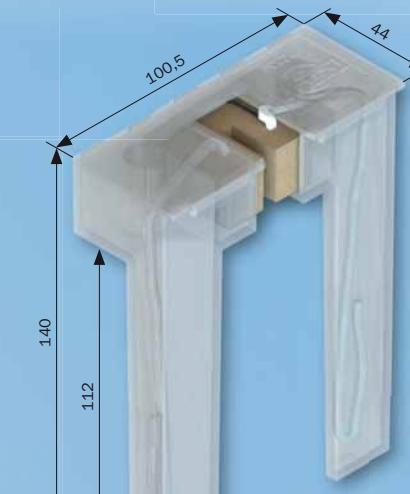

(for rail widths up to 16 mm/fixation M5 x 16 mm)

### art. no. 90 323.01

(for rail widths from 19 to 24 mm/fixation with tapping screw Ø 5 x 16 mm)

### art. no. 90 323.02

(for rail widths from 28 to 30 mm/fixation with tapping screw Ø 5 x 16 mm)

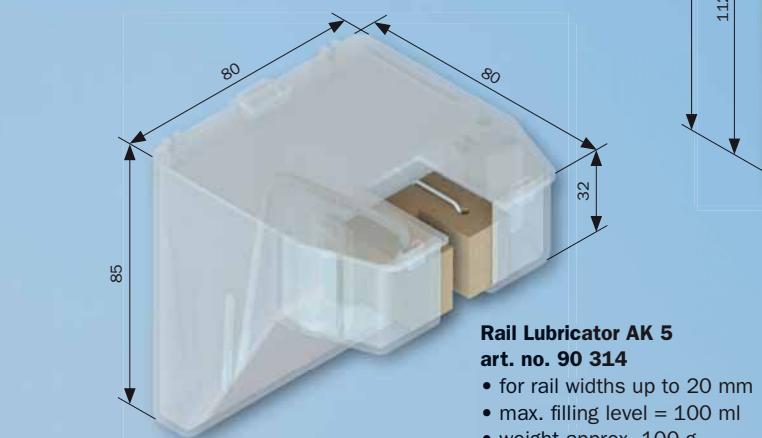

### Rail Lubricator AK 4

- for rail widths from 9 to 16 mm
- max. filling level = 40 ml
- weight approx. 90 g

### art. no. 90 337

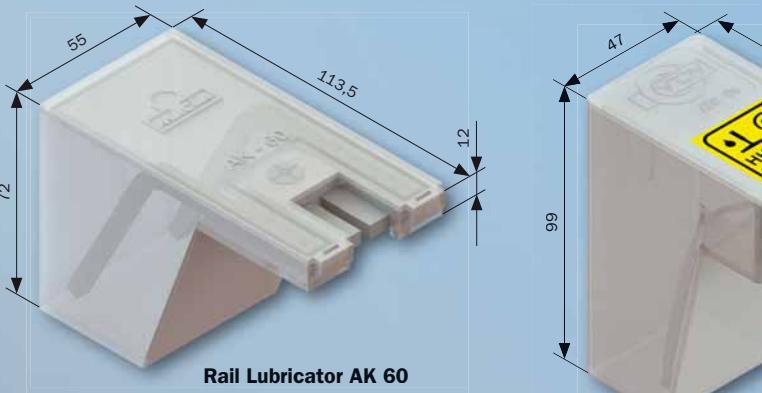

(fixation M5 x 6 mm)  
**art. no. 90 337.01**  
(fixation with tapping screw Ø 5 x 16 mm)

### Rail Lubricator AK 5

#### art. no. 90 314

- for rail widths up to 20 mm
- max. filling level = 100 ml
- weight approx. 100 g

### Rail Lubricator AK 60

#### art. no. 90 335

- for rail widths from 5 to 16 mm
- max. filling level = 100 ml
- weight approx. 75 g

### Rail Lubricator AK 1

- max. filling level = 140 ml
- weight approx. 60 g

### art. no. 90 327.01

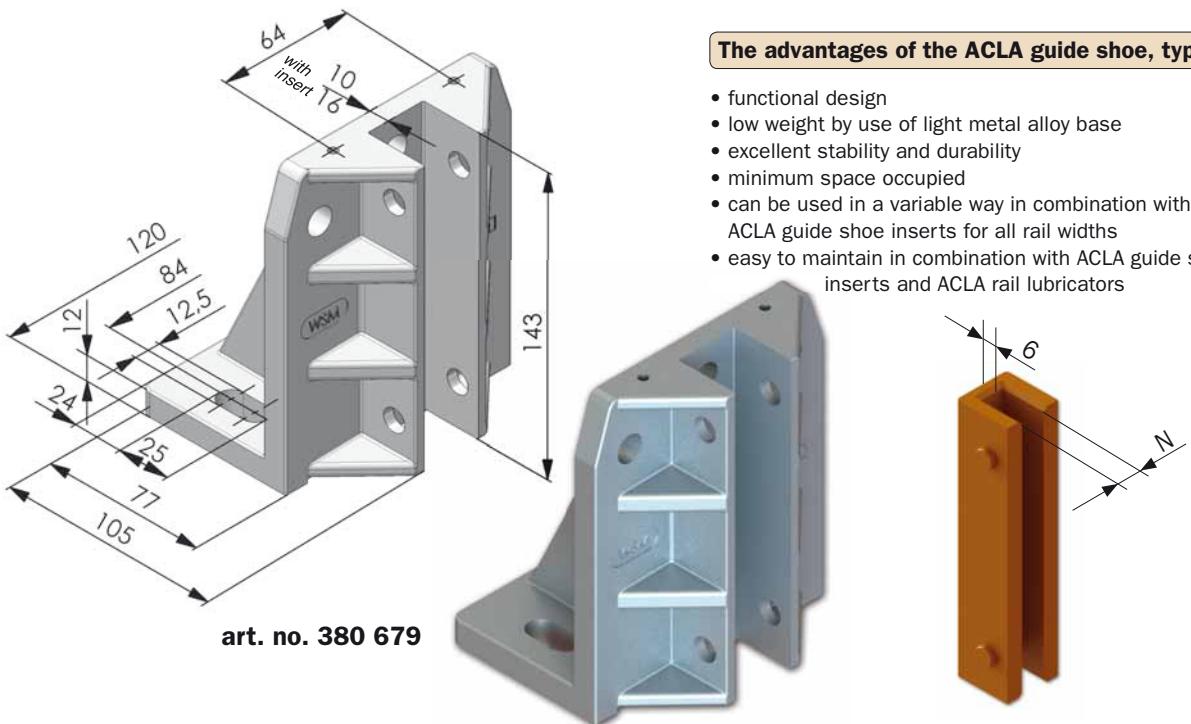

(for rail widths from 5 to 10 mm)  
**art. no. 90 327.04**  
(for rail width 16 mm)

### Recommended lubricants:

Gear or machine oil.  
Kinematical viscosity  
60 - 80 mm<sup>2</sup>/s, 40°C  
corresponding to  
ISO VG 68

## ACLA Angled Guide Shoe, type WSM

- installation height 143 mm
- undamped and damped guide shoe inserts for rail widths of 5 - 20 mm
- rail lubricators AK 2, AK 5 and AK 10 are appropriate

### The advantages of the ACLA guide shoe, type WSM

- functional design
- low weight by use of light metal alloy base
- excellent stability and durability
- minimum space occupied
- can be used in a variable way in combination with ACLA guide shoe inserts for all rail widths
- easy to maintain in combination with ACLA guide shoe inserts and ACLA rail lubricators

### Appropriate ACLA rail lubricators for guide shoe WSM

(for detailed information on ACLA rail lubricators, please see page 31)

Rail lubricator AK 2  
art. no. 90 323

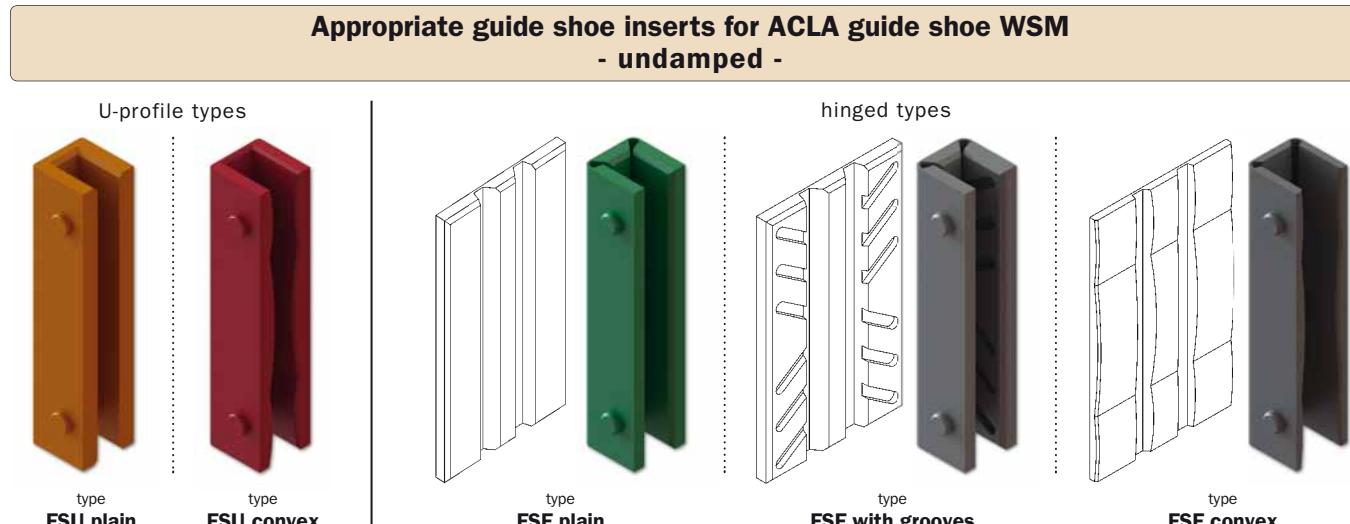

Rail lubricator AK 10  
art. no. 90 021

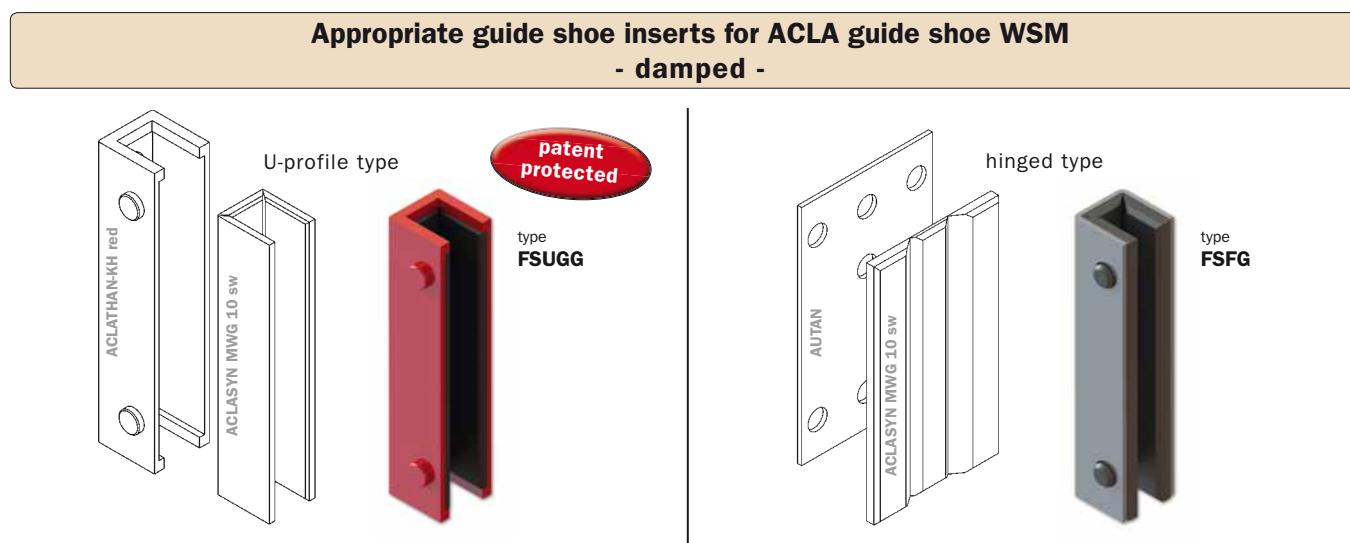

Rail lubricator AK 5  
art. no. 90 314

ACLA guide shoe WSM,  
mounted with lubricator AK 10  
and undamped guide shoe insert,  
type FSF with grooves (ACLAMID)

ACLA guide shoe WSM,  
mounted with lubricator AK 2  
and undamped guide shoe insert,  
type FSU plain (ACLATHAN)

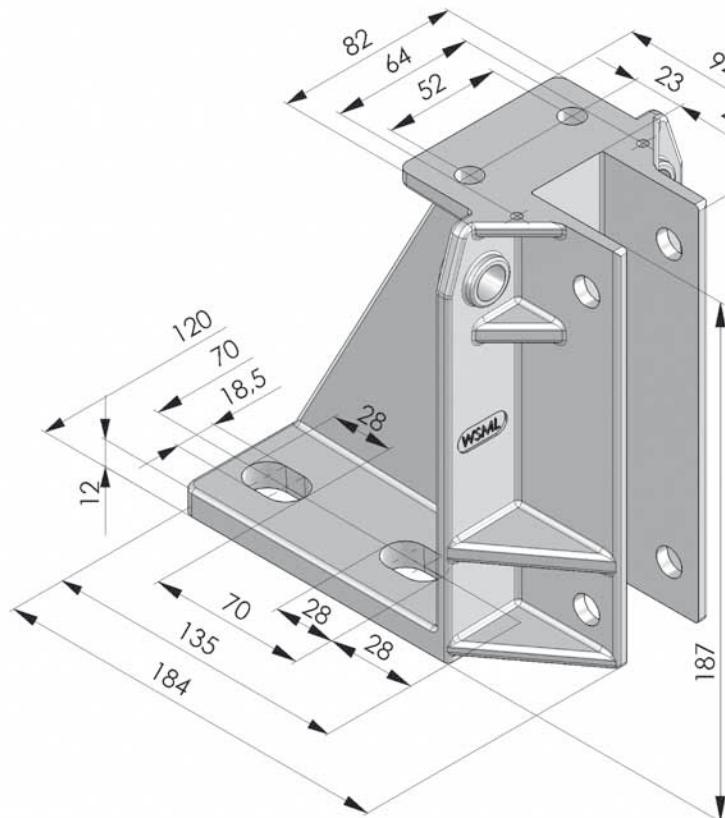

### article numbers for WSM guide shoe inserts

ACLATHAN = brown, ACLATHAN-KH = red, ACLAMID = green, ACLASYN GR = grey, ACLASYN MWG 10 (sw) = black.

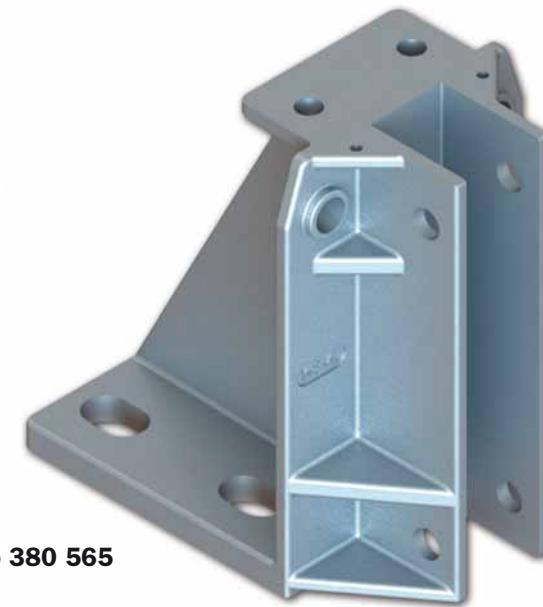

## ACLA Angled Guide Shoe, type WSML

- installation height 187 mm
- guide shoe inserts for rail widths of 14 - 29 mm
- rail lubricators AK 2 and AK 10 are appropriate

### The advantages of the ACLA guide shoe, type WSML

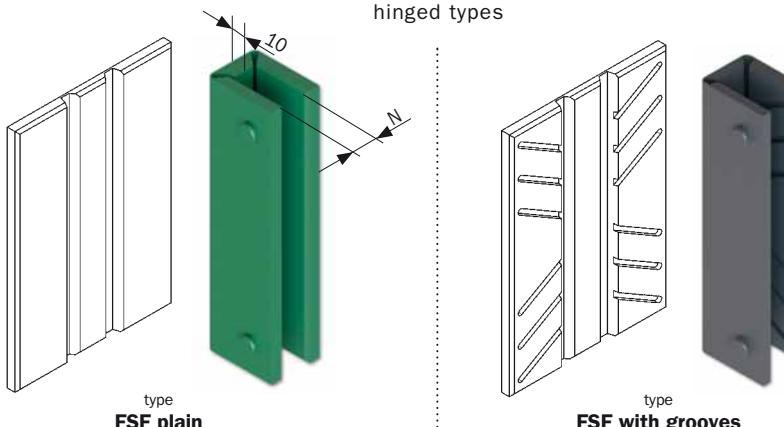

- functional design
- low weight by use of light metal alloy base
- excellent stability and durability
- minimum space occupied
- can be used in a variable way in combination with ACLA guide shoe inserts for rail widths from 14 to 29 mm
- easy to maintain in combination with ACLA guide shoe inserts and ACLA rail lubricators

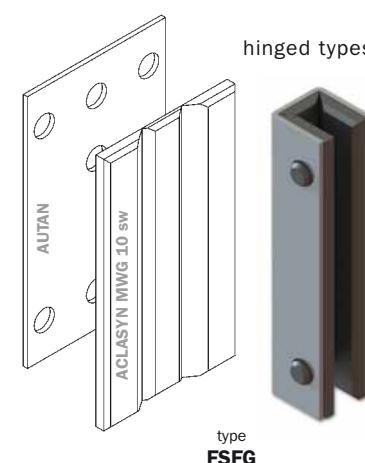

art. no 380 565

## ACLA Angled Guide Shoe, type WSMXL

- installation height 365 mm
- guide shoe inserts for rail widths of 14 - 29 mm
- rail lubricators AK 2 and AK 10 are appropriate

### The advantages of the ACLA guide shoe, type WSMXL

- special design for high load lifts
- low weight by use of light metal alloy base
- excellent stability and durability
- minimum space occupied
- can be used in a variable way in combination with ACLA guide shoe inserts for rail widths from 14 to 29 mm
- designed for ACLA guide shoe inserts mounted in tandem each 180 mm long
- easy to maintain in combination with ACLA guide shoe inserts and ACLA rail lubricators

### Appropriate ACLA rail lubricators for guide shoe WSMXL

(for detailed information on ACLA rail lubricators, please see page 31)

Rail lubricator AK 2  
art. no. 90 323

ACLA guide shoe WSMXL,  
mounted with lubricator AK 2  
and undamped guide shoe insert,  
type FSF with grooves  
(ACLATHAN-KH).

Rail lubricator AK 10  
art. no. 90 021

ACLA guide shoe WSMXL,  
mounted with lubricator AK 10  
and undamped guide shoe insert,  
type FSF with grooves  
(ACLAMID).

## **ACLA roller guides: well conceived construction to the detail**

Detailed information on our ACLA roller guide program can be found  
in our separate brochure „Roller Guides for Lift Engineering“

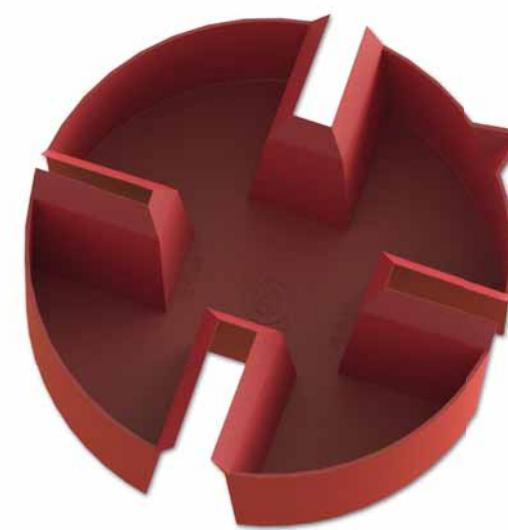

## **Oil Collector "Universal"**

- for rail widths up to 16 mm
- simple assembly without tools

**Oil Collector  
art. no. 70 369.01**

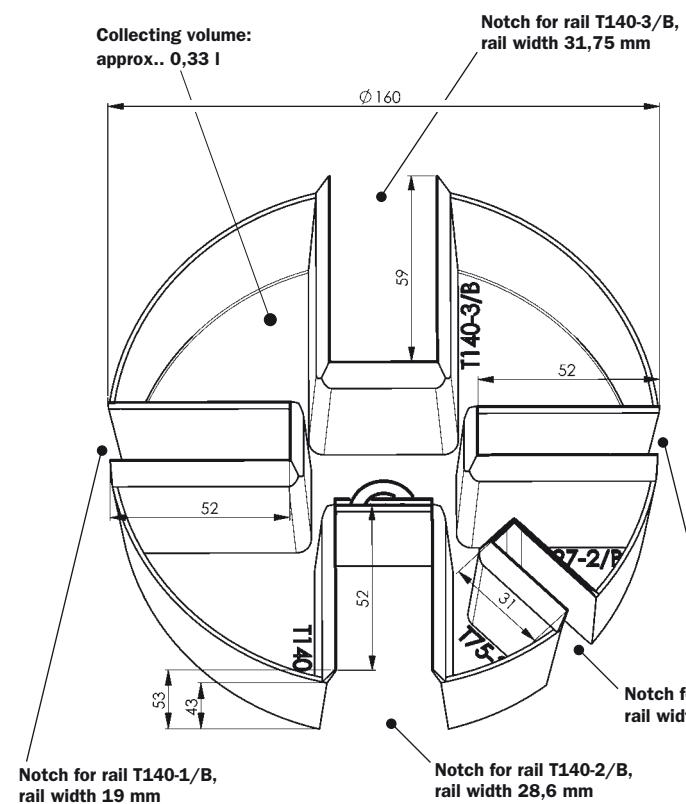

**The advantages of the  
ACLA Oil Collector "Universal"**

- The Oil Collector is made of an oil and fracture resistant material with high thermal stability
- Fast assembly and emptying without any tools or other auxiliary means

## **Oil Collector „Variable“**

- for rail widths up to 31,75 mm
- simple assembly without any tools or accessories

**Oil Collector  
art. no. 70 369.02**

**The advantages of the  
ACLA Oil Collector „Variable“**

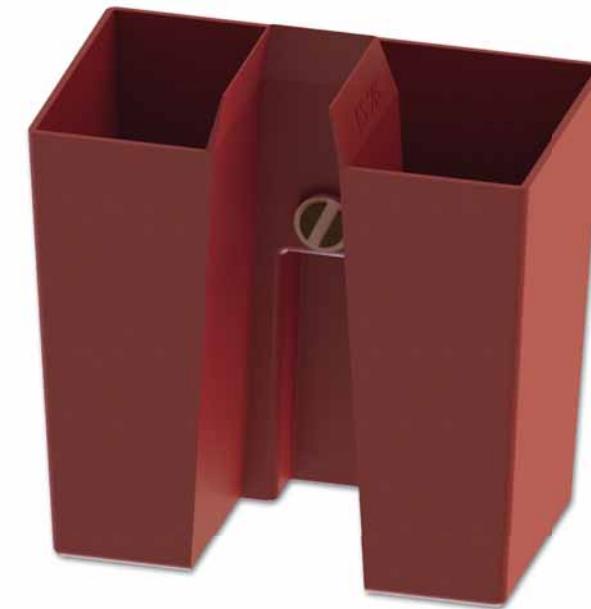

- The Oil Collector is made of an oil and fracture resistant material with high thermal stability
- Fast assembly and emptying without any tools or other auxiliary means

## **Oil Collector MB (with magnetic fastener)**

- Executions for rail width 5, 10, 16, 19 and 28 mm
- Simple assembly with magnetic fastener

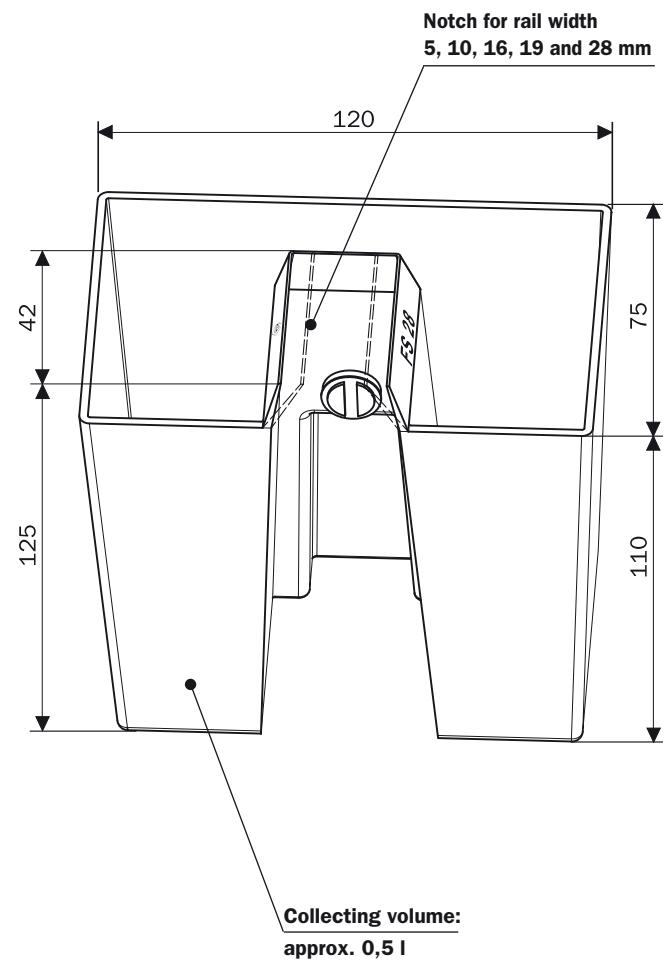

**The advantages of the  
ACLA Oil Collector MB  
(with magnetic fastener)**

- The Oil Collector is made of an oil and fracture resistant material with high thermal stability
- Simple assembly at any position of your choice by means of magnetic fastener
- Also available without magnetic fastener

28 mm	70 449.28

**Collecting volume:  
approx. 0,5 l**

## **Oil Collector AT with Clamping Elements of ACLATHAN®**

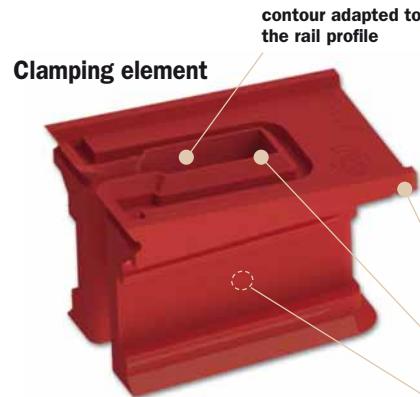

- for rail widths from 5 up to 16 mm using the appropriate clamping elements
- no leakages at all sealing surfaces
- fast assembly without tools

### **Advantages of the ACLA Oil collector AT**

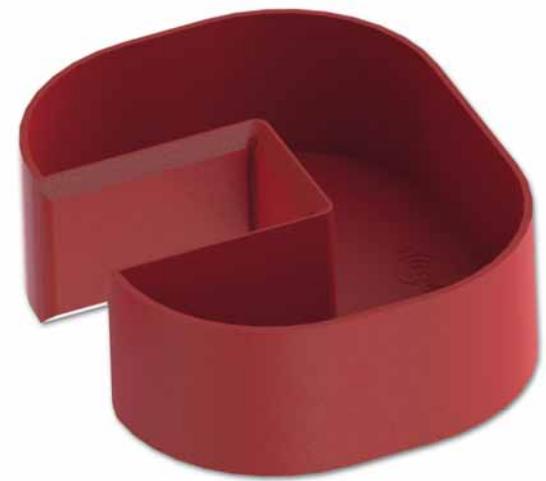

- On account of the functional construction of the clamping element the sealing of the rail profile is assured up to the rail base
- The clamping element and oil collector are made of an oil and fracture resistant material with high thermal stability
- The clamping element is deliverable for all rail types
- No leakages at all sealing surfaces
- The seal lip of the clamping element prevents creeping oil
- The snap cams of the oil collector prevent an unintended slipping from the clamping element and can be slightly lifted for removal
- By means of slipping the oil collector onto the rail a secure clamping effect is achieved
- Fast assembly and emptying without tools or other auxiliary means
- Easy oil level check

### **The correct clamping element for any rail**

The clamping elements for the ACLA Oil Collector AT are manufactured of the polyurethane elastomer ACLATHAN and are especially distinguished by their good oil resistance, breaking strength and thermal stability.

**Oli collector AT**  
art. no. 70 316

please lift oil dripping edge when removing the oil collector AT  
sealing edge for running and foot area of the rail

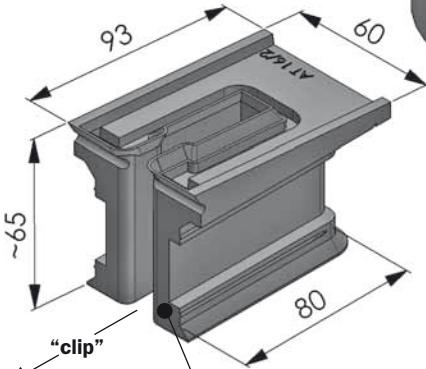

if necessary drill cross hole for locking-pin.  
Pin length max. 35 mm

For all popular rail types suitable  
clamping elements are deliverable  
(see pages 44/45). In case  
of dimensional discrepancies of  
the contours a compensation  
by means of sealing material is  
necessary.

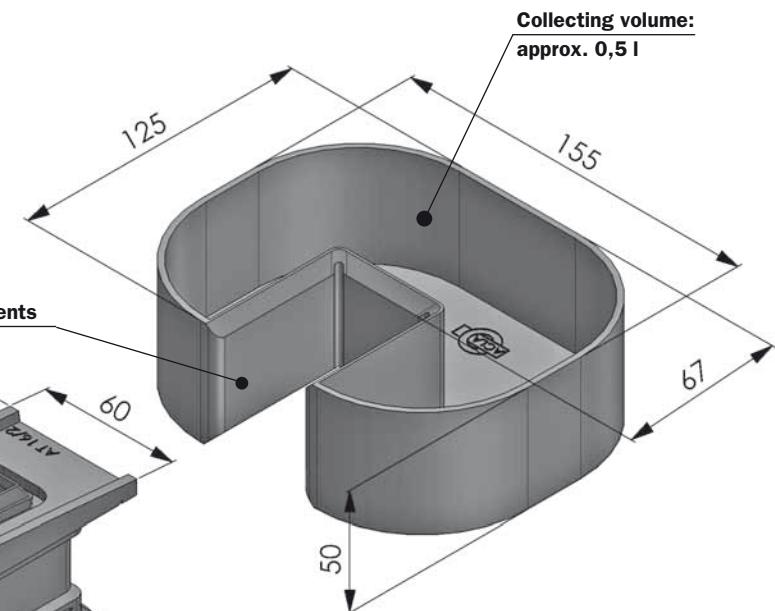

**Guide rail**  
(not for sale)

**Notch suitable for  
all clamping elements**

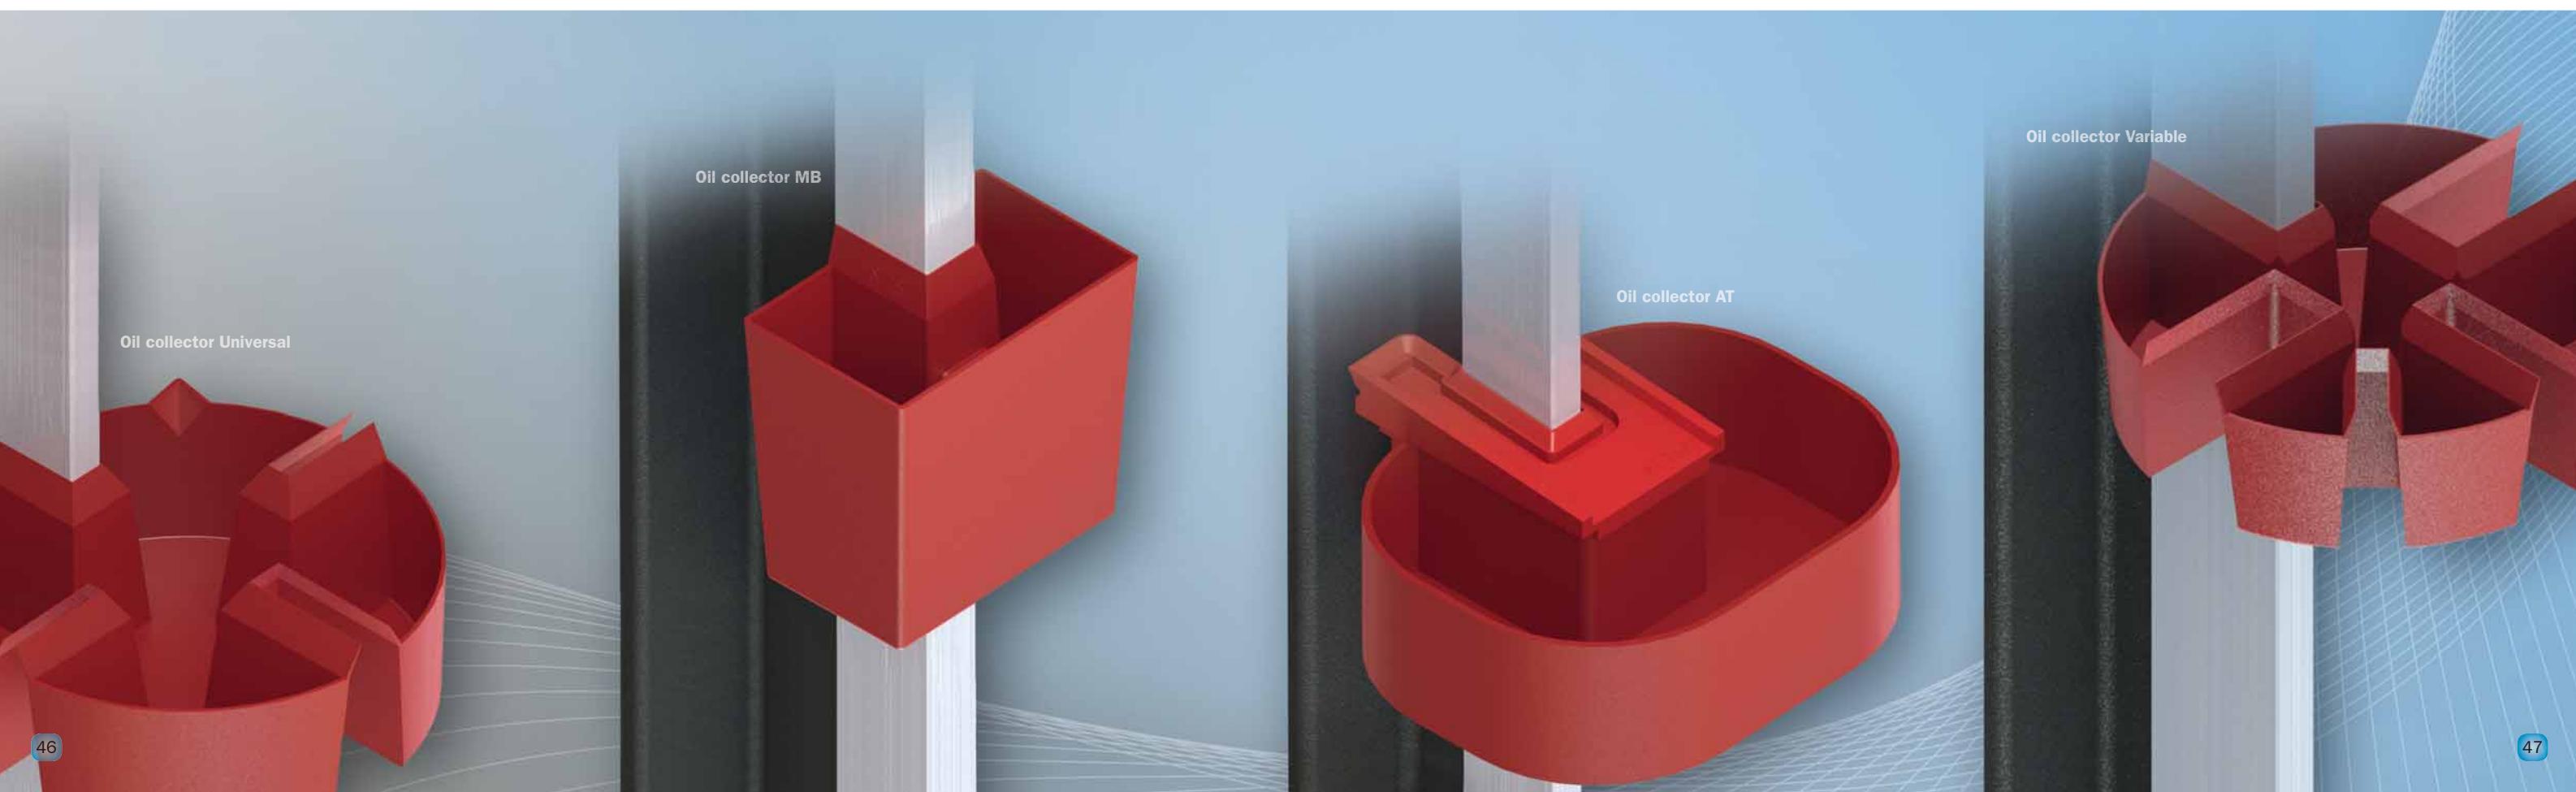

**Clamping element types**  
for all rails see page 48/49

### **Mounting order:**

1. Slip clamping element onto the rail
2. Slip oil collector over the clamping element against the end-stop

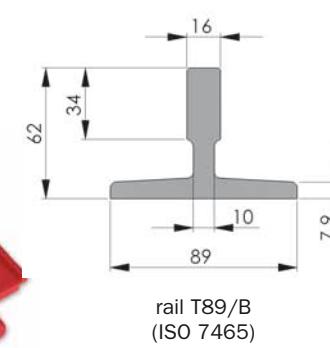

## Clamping Elements of ACLATHAN®

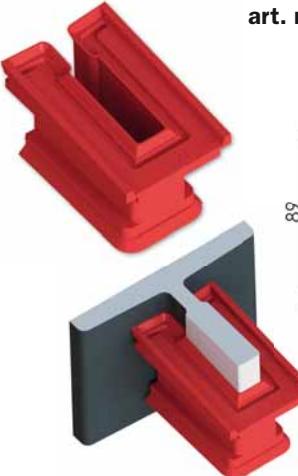

**Clamping element AT 16/1**  
for rail T89/B as per ISO 7465

with round  
fixing plate  
of steel

type D  
with integrated  
steel plate

### Nominal article sizes

Lift Buffers of AUTAN® HE certified as per EN 81-20/50  
and Lift Directive 2014/33/EU

### The ACLA safety product on the latest state-of-the art

We ensure planning certainty for all your future lift projects based on the applicable standard EN 81-20/50 and lift directive 2014/33/EU. All offered buffers are type-tested according to the current regulations.

Putting the focus on the optimisation of manufacturing technology our lift buffers of AUTAN HE series S offer extended application ranges as to min. and max. loads.

All buffers of series S comply with the important mounting height of 80 mm.

### Maintenance 4.0 integrated

Important product data is digitally marked on each ACLA lift buffer of AUTAN HE.

The following table is an overview of our delivery program incl. the admissible application ranges.

**TÜV NORD**

Type-examination certificates and declarations of conformity can be downloaded from our website "www.acla-werke.de".

Series S of AUTAN® HE:  
widened application range  
at min. and max. loads!

# Lift Buffers of AUTAN® HE: Additional types

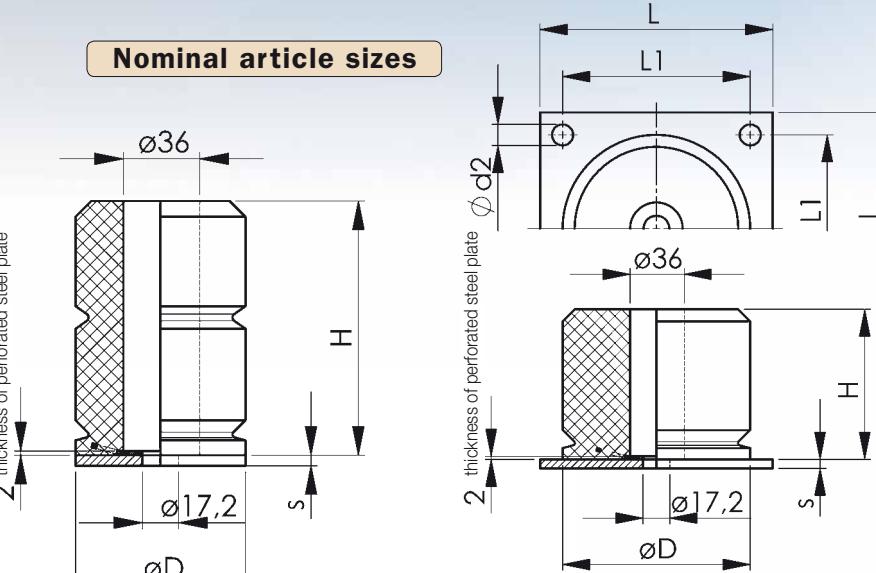

**Enhanced security as to fixing**  
We were now able to widen our delivery program for lift buffers of AUTAN HE from 3 to 5 buffer types by extensive application- and field tests as well as optimized production methods in our serial production.

Both of our new patent protected buffer types „AD“ and „CD“ show best results in practical use by their significantly improved fixing security.

Provided that the recommended maintenance intervals are kept,

separations of the buffer from the steel plate can be excluded under normal service conditions.

Technical information and type-examination certificates of these new lift buffer types of AUTAN HE will be submitted on demand.

**Delivery program**

# Every millimetre counts! Expansion and deflection of ACLA buffers of AUTAN® HE

## Technology advantage in favour of construction

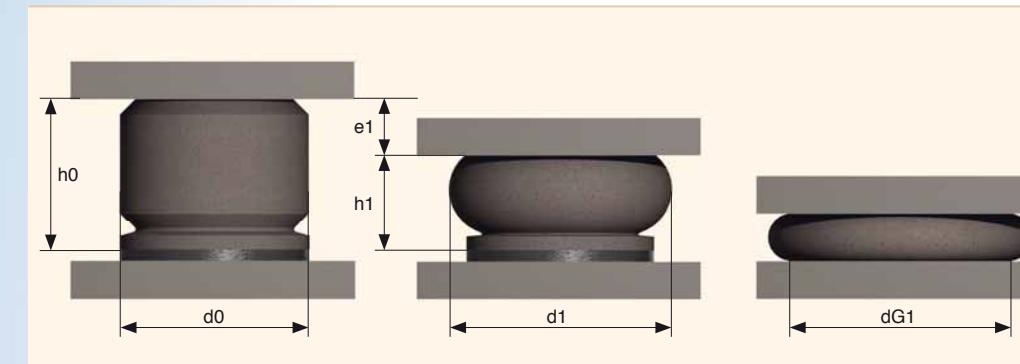

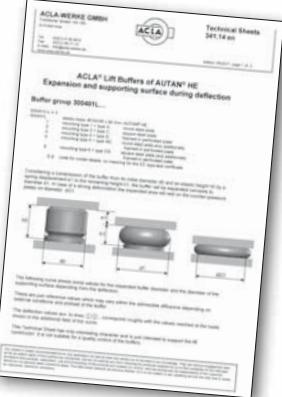

The high-grade PUR material AUTAN HE used for our ACLA lift buffers offers a clear technical advantage to the lift manufacturer in relation to construction:

The actual deflection of most buffer types of AUTAN HE is significantly less than the value of 90 % of the initial foam height required by the applicable standard. Thus total construction heights can be reduced in a cost-efficient manner.

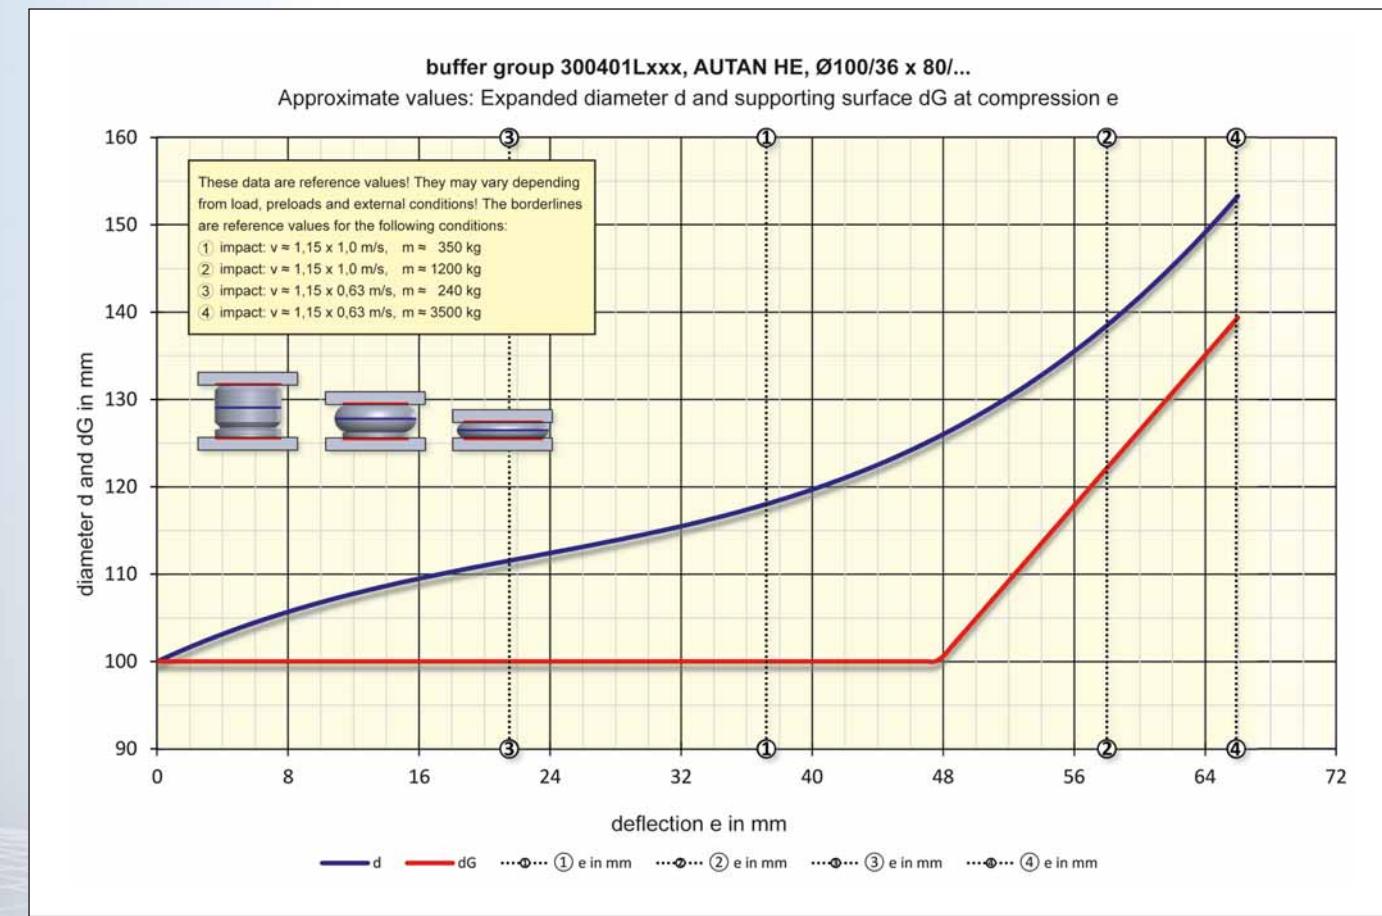

The below diagram gives you a first impression of this important issue to the constructor.

Upon request, we will send you our „Technical Sheets 341“ giving detailed information about the expansion and deflection at the min. and max. loads. They may serve as a support in lift configuration and approval.

Please contact us for more information.

Considering a compression of the buffer from its initial diameter  $d_0$  and an elastic height  $h_0$  by a spring displacement  $e_1$  to the remaining height  $h_1$ , the buffer will be expanded convexly to diameter  $d_1$ . In case of a strong deformation the expanded area will rest on the counter-pressure plates on diameter  $d_{G1}$ .

# ACLA's Manufacturers Competence starts with the processing of raw materials

## Rope Suspension Springs of AUTAN®

### Excellent damping properties

Rope Suspension springs of AUTAN are designed for the compensation of the rope length. On account of the excellent damping properties of the polyurethane elastomer AUTAN high compression of the spring can be achieved with low article height and transverse expansion. AUTAN is highly resistant against wear and tear as well as mineral oils and grease. The springs can be easily mounted and keep their natural stability for a long time. The permanent deformation as per DIN 53 572 at 20° C (68° F) is lower than 3%.

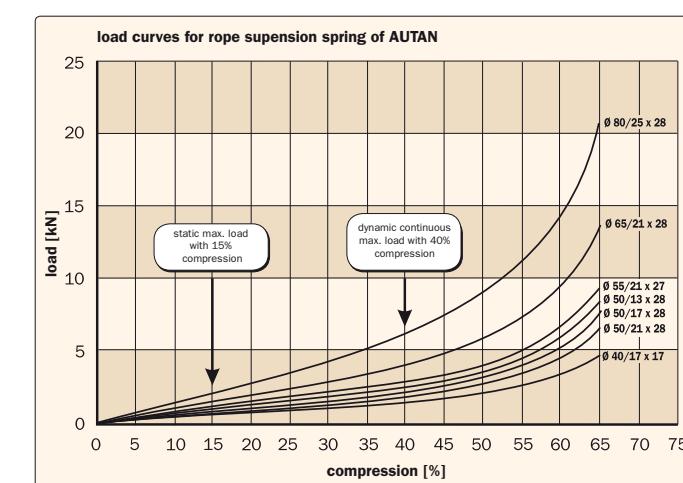

### Important operation instructions:

- In case of multilayer mounting we recommend the use of steel separators with an O.D. of 1,4 x D.
- The dynamic continuous load is admissible up to 40% of the length H.
- The max. static continuous load is admissible up to 15% of the length H.
- With shock loads the max. compression should not exceed 76% of length H. Overloads change the compression curve. The replacement of the product is necessary in this case.
- With mounting side by side a drilling center of 1,5 x D is admissible.
- After 5 years the elasticity should be checked.

**Rope suspension spring with collar**

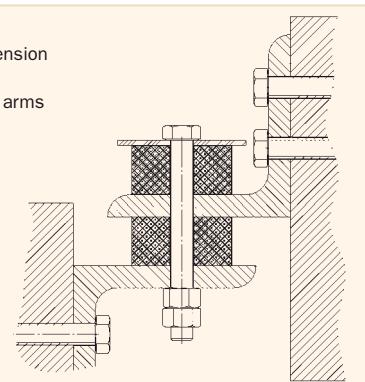

**Rope suspension spring without collar**

### Further range of application:

- Buffer and counterbuffer suspension
- Machine suspension (general)
- Suspension for torque support arms
- Suspension for Compressors
- Engine suspension
- Mounting Suspension (general)

## Flat and Round Cable Suspensions of ACLAMID®/yellow and nature

The material ACLAMID offers the best quality for the functioning of cable suspensions

The ACLA flat cable and round cable suspensions are made of ACLAMID/PA6 with colour yellow or nature, a special polymer with a high Young's modulus.

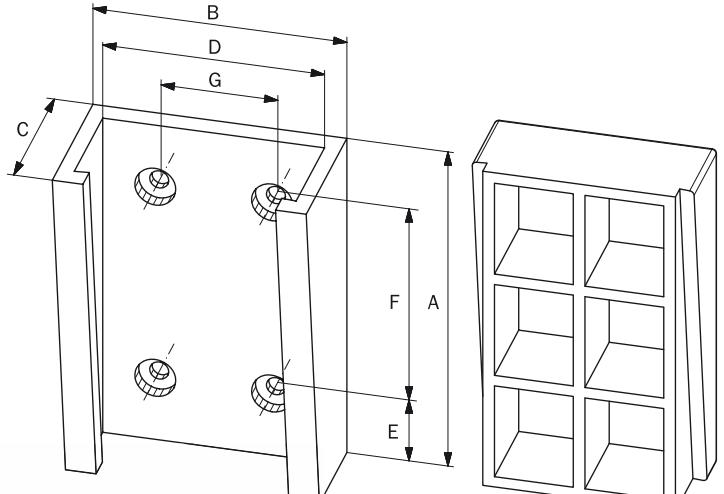

The material ACLAMID/PA6 has got many advantages which are ideal for the application as cable suspensions:

- small deformation
- high stability
- temperature range from -20° C to +80° C (-4° F to +176° F)
- good resistance against various agents

(colour may vary in final execution)

## Rope Pulleys of ACLAMID®

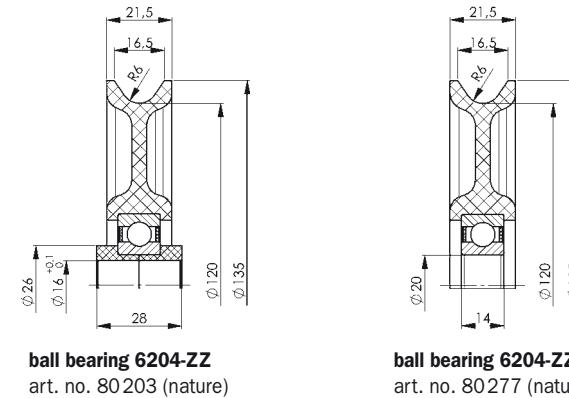

### Construction of the rollers

Roller body of ACLAMID (special polyamide) with ball bearings as per DIN.

### Important properties of ACLAMID

- special polyamide with high Young's modulus
- more silent running than steel pulleys
- low rolling friction
- high natural stability
- temperature range from -20°C to +80°C (-4°F to +176°F)

## Profiled Rollers and Door Guide Rollers of ACLAMID®/Pa NL or ACLATHAN®/Pu NL

### Tyres

**type Pa NL:**

special polymer  
(i.e. ACLAMID)  
with high Young's modulus

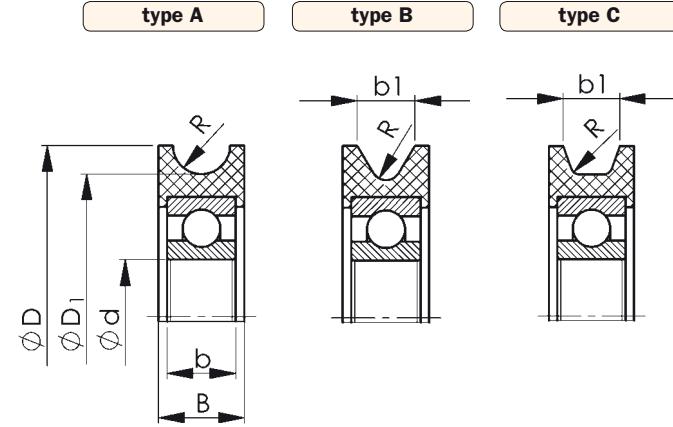

**type Pu NL:**

Polyurethane-elastomers  
in different hardnesses

### Properties

- low rolling resistance
- small deformation
- high surface pressure
- silent running compared with steel rollers

### Nominal article sizes/executions

**executions without axle (diagrammatic sketches)**
**type A**
**type B**
**type C**

**Legend**

- <sup>1)</sup> Ø d can be modified by means of bushes
- <sup>2)</sup> roller with 2 grooves

**Remarks:** The contours of the grooves can be adapted by machining as per drawing or sample.

## Step and Chain Rollers of ACLATHAN®

### Tyres

**type Pu L:**

Polyurethane elastomer,  
approx. 90 to 95 Shore A

**type Pu Pa L:**

Polyurethane elastomer,  
approx. 90 to 95 Shore A

**type Pu St L:**

Polyurethane elastomer,  
approx. 94 Shore A

**type Pu Al L:**

Polyurethane elastomer,  
approx. 94 Shore A

### Properties

- extremely abrasion resistant
- resilient
- silent running
- no chalking
- temperature range -30° C to +80° C (-72° F to +176° F)

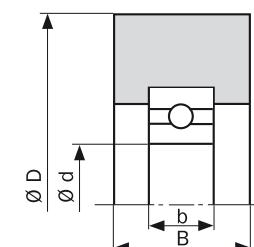

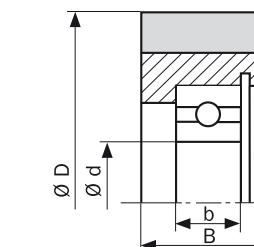

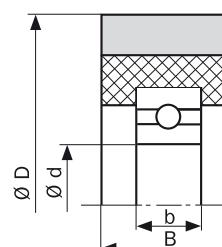

**Legend**

Pu = polyurethane  
 Pa = polymer (i.e. ACLAMID)  
 St = steel  
 Al = aluminium  
 L = bearing

### Executions

## ACLA Rollers of ACLATHAN® for ACLA Roller Guides and other Roller Guides

### Tyre and properties

The rollers of the high-quality polyurethane elastomer ACLATHAN for the lift industry offer the following advantages for the application:

- low rolling resistance
- high load capacity
- excellent abrasion and wear resistance

utilization	D	d	B	B <sub>1</sub>	b	designation	execution	bearing	(quantity)	type	art.no.
